the Little Cat Overview

“We create a bond with pets based on healthcare data”

Our pets never TALK to us, even though they are very sick or hurt. So, For the never-verbal family member, 'the Little Cat' provide customized health-care solutions by gathering and analyzing data about pets through 'the Little Cat' IoT devices.

The Little Cat's all IoT products take a inspiration from The Little Prince story book. So, our all products are related to the characters and elements of The Little Prince.

the Little Cat

BIA (Bioelectrical Impedance Analysis) based on Cat Body Composition Monitor

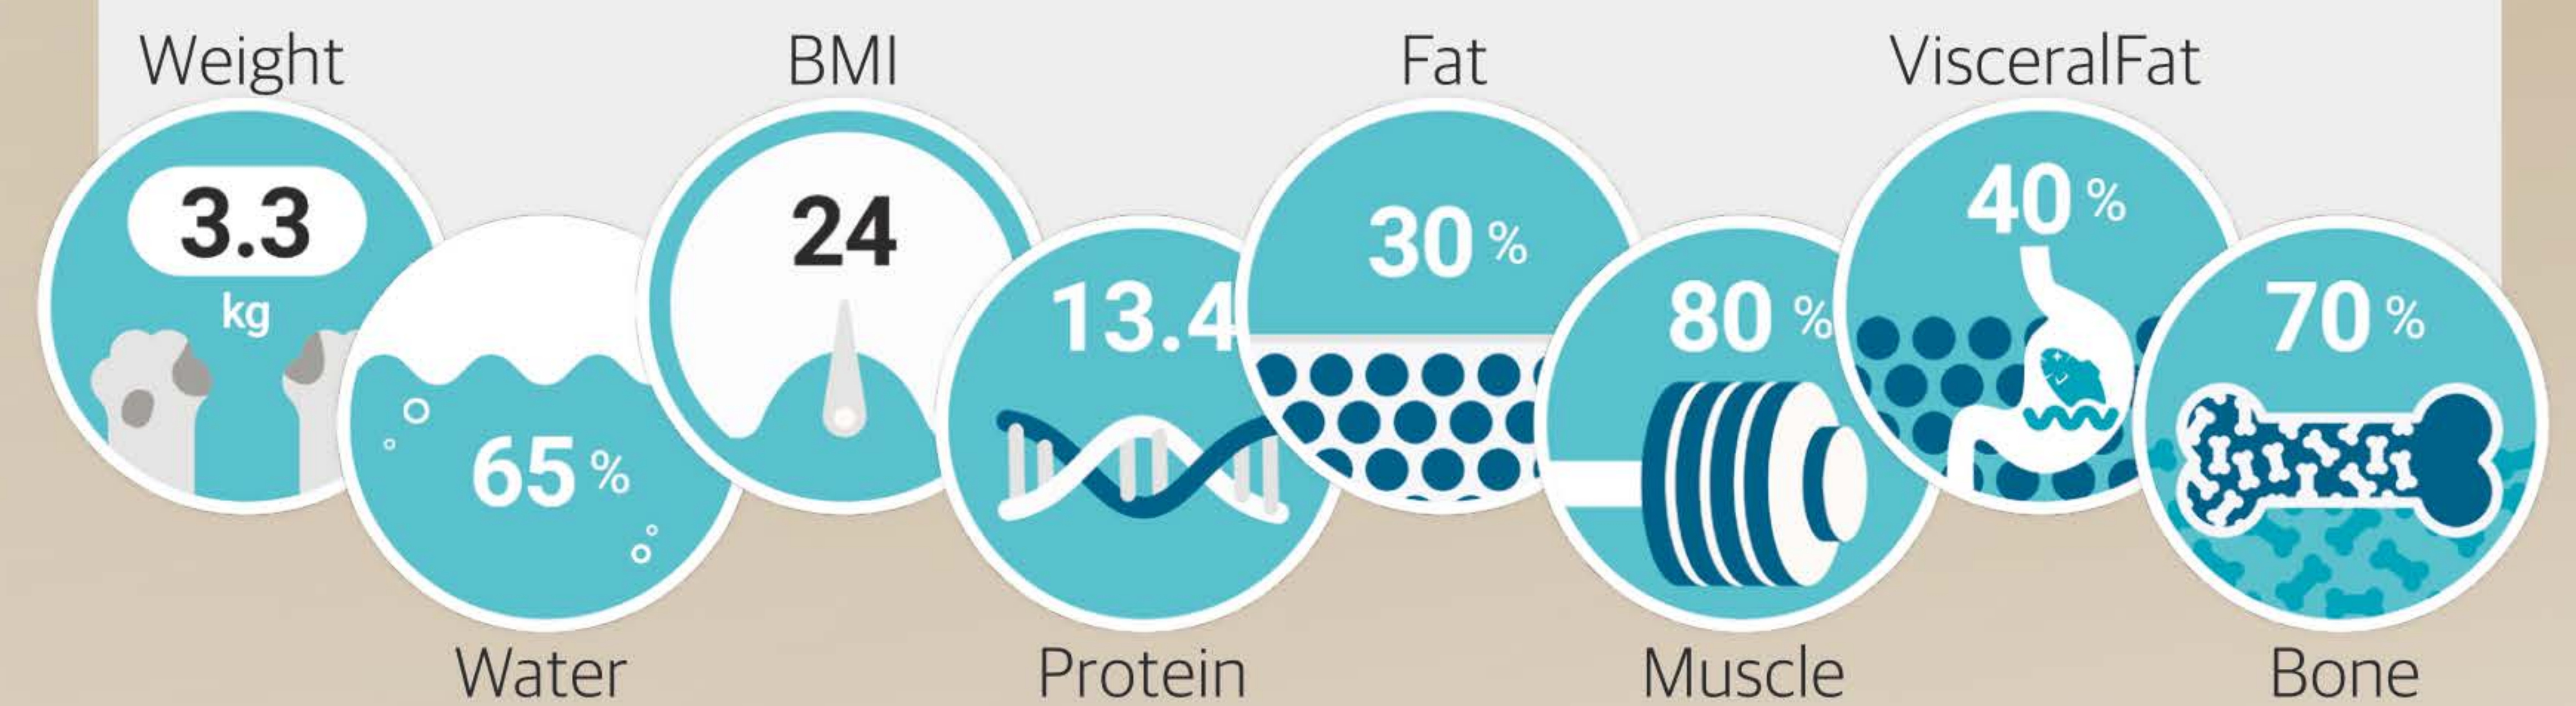

Body composition monitor using cat's instinct

Taking advantage of the cat's instinct to enter the circle, it automatically measures body composition quickly and accurately through the paw pads when the paw enters the circle.

Monitor 8 body compositions with a dedicated app.
(Body water, Visceral fat, Subcutaneous fat, Protein, Muscle, Bone density, BMI, Weight)

Measurement of 8 body composition using INPET App

Solving feeding challenges

Feed recommendations based on body composition

Vital signs and telemedicine alarms

Reduce healthcare costs by predicting signs of illness through changes in body composition, supporting telemedicine consultations, and preventing disease

Premium discounts

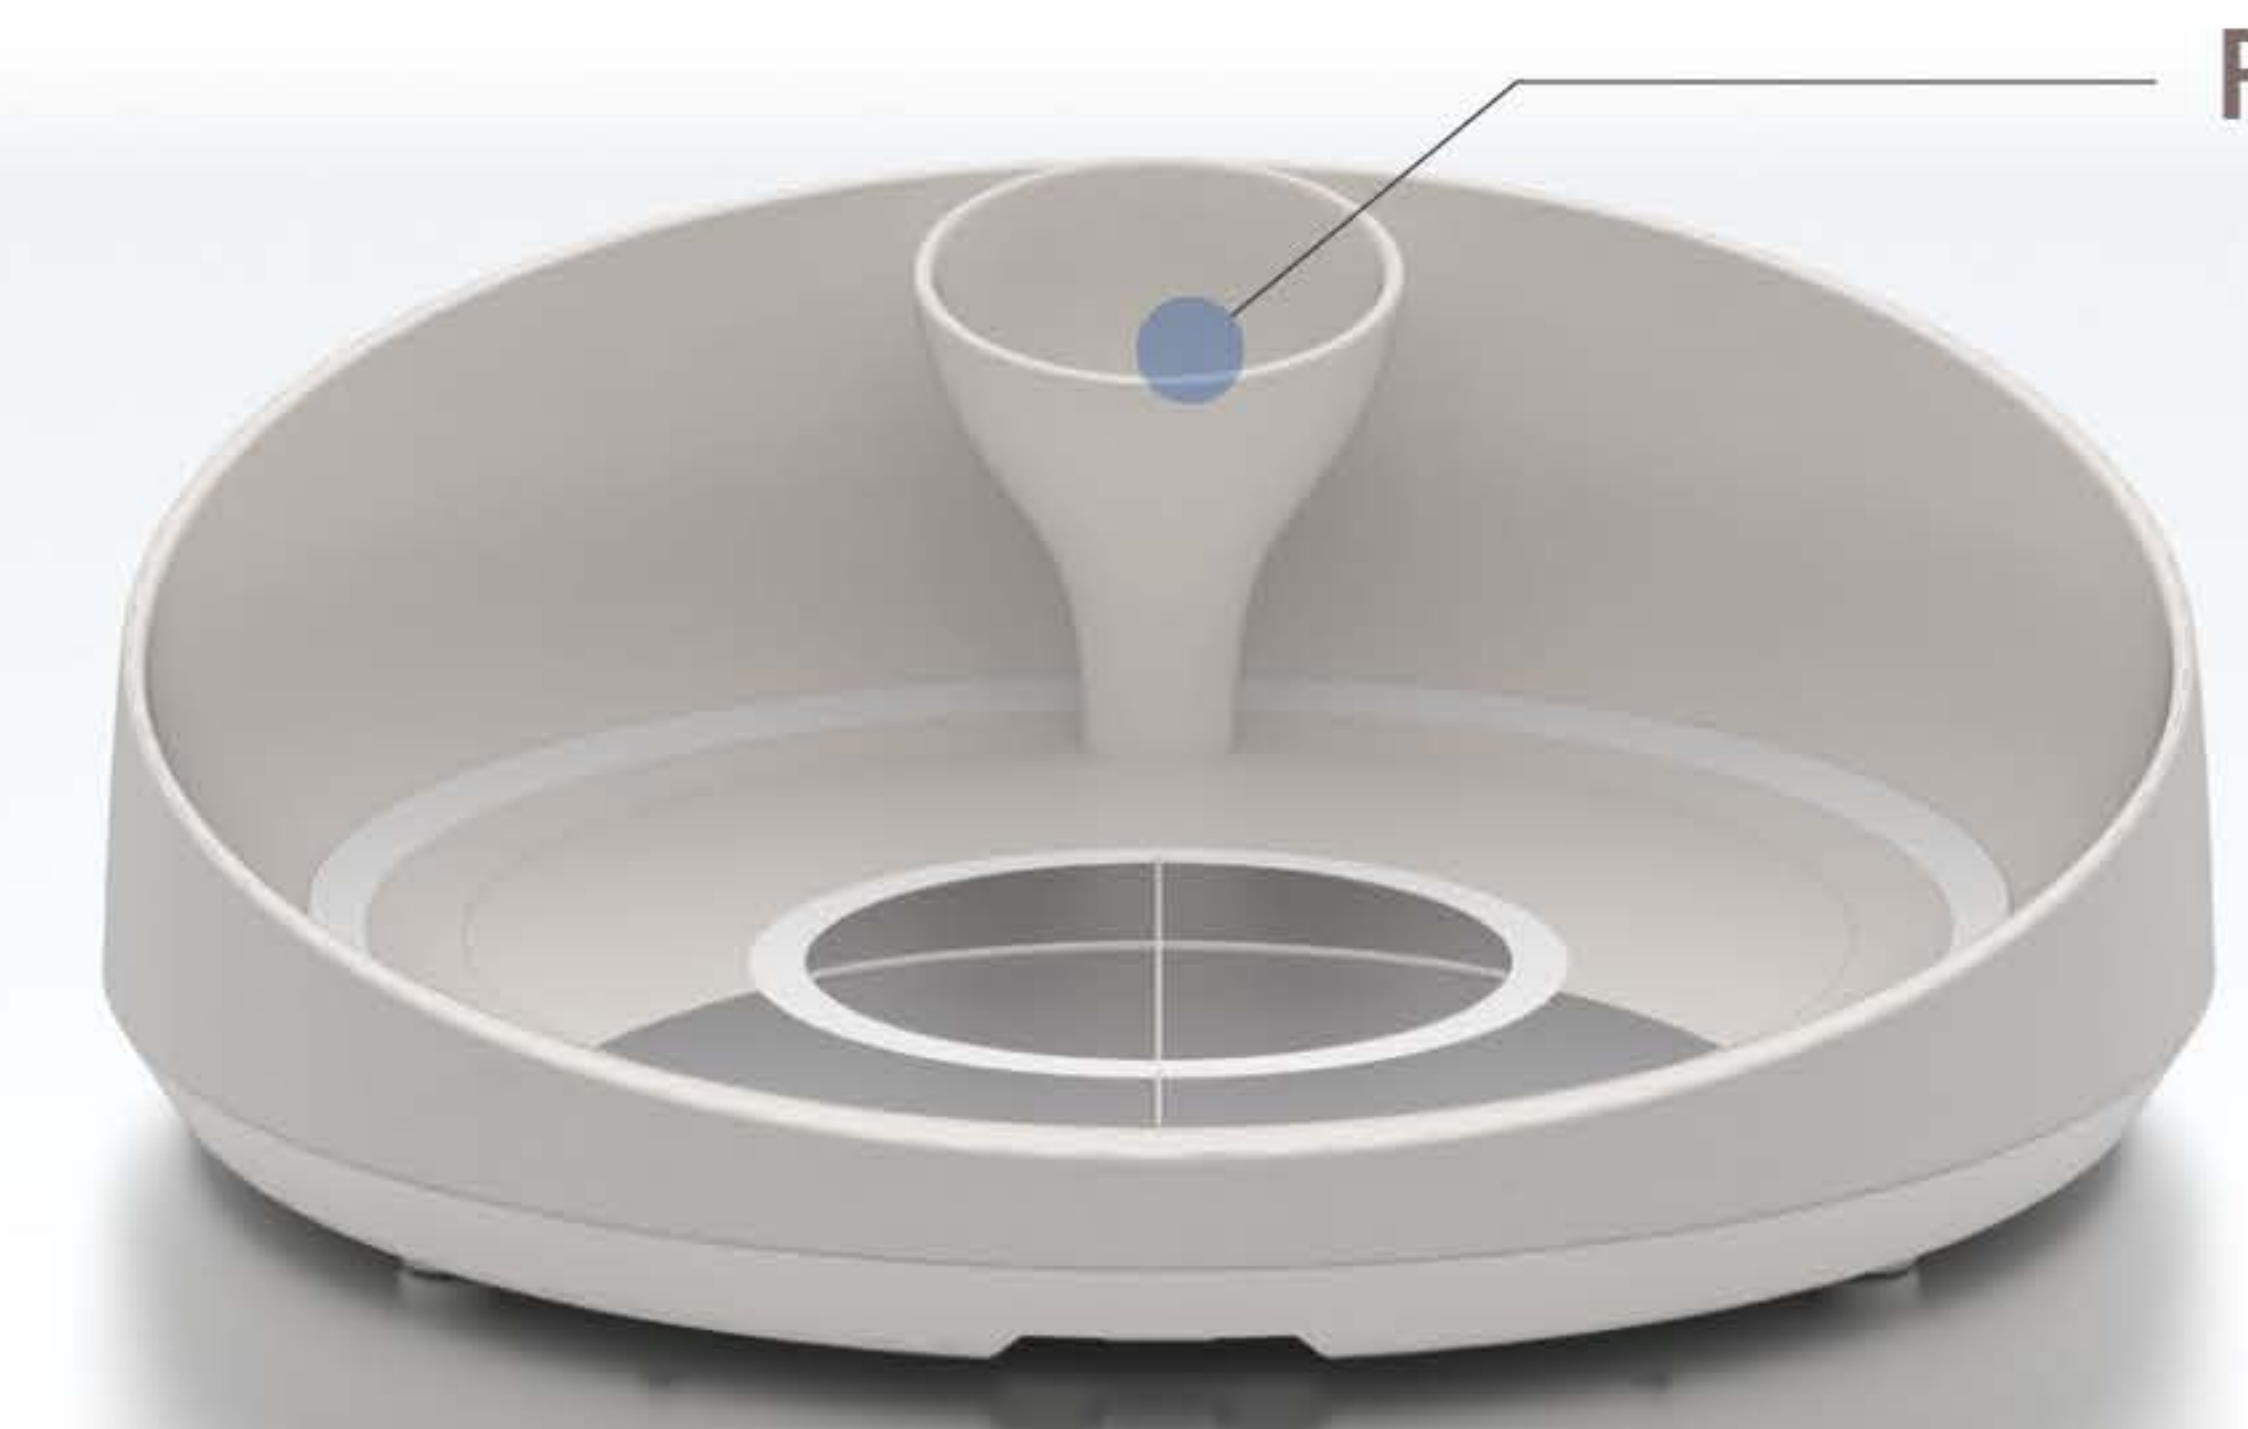

Reduced premiums with regular body composition reports and real-time monitoring

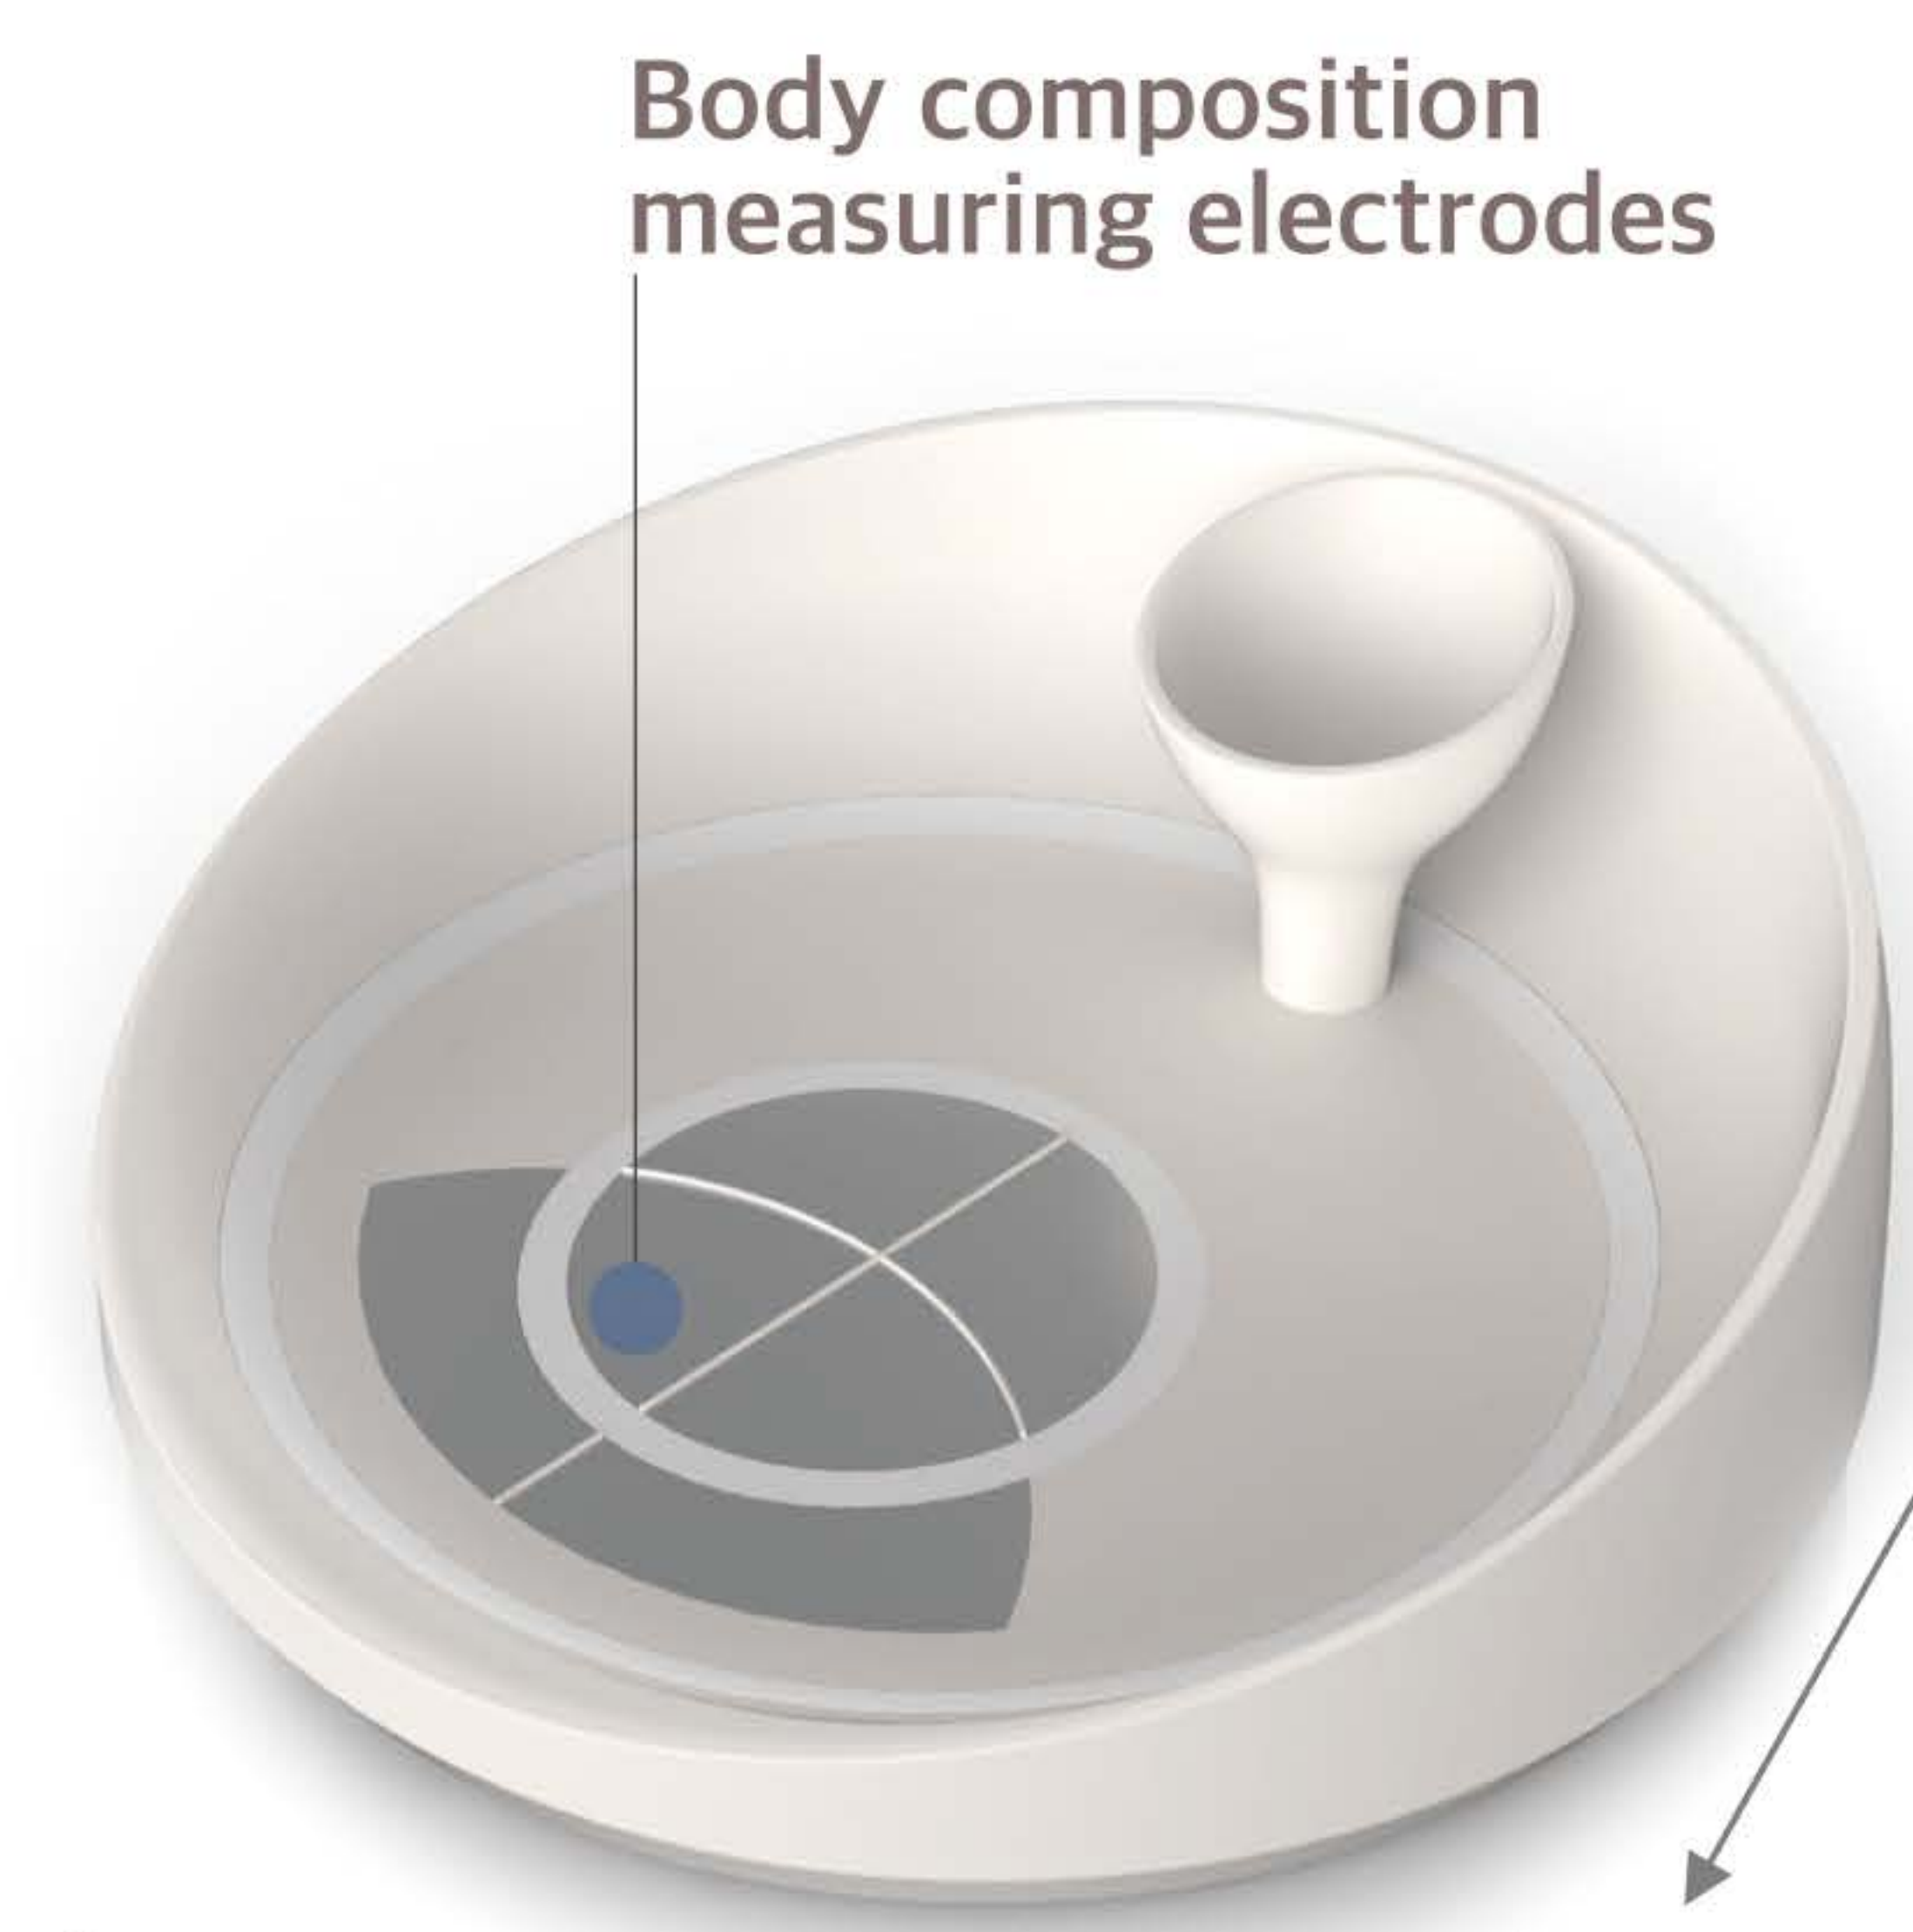

LED to attract the cat
Create and change your cat's favourite colours

USB-C Chargers
Use a 5V 2A rated charger
No battery, always on

Food bowl

the Little Cat

Cat Smart Wheel

IoT-based indoor exercise machine linked with application
Designed to stimulate the dynamic visual acuity of cats

Easy to use

You can easily check the cat exercise data with the app.

Bluetooth connection

Bluetooth Connectivity to Measure and Adjust Data Value

LED light control

You can adjust the LED light color and light position with the app.

Exercise measurement

You can check the calorie consumption according to the amount of exercise.

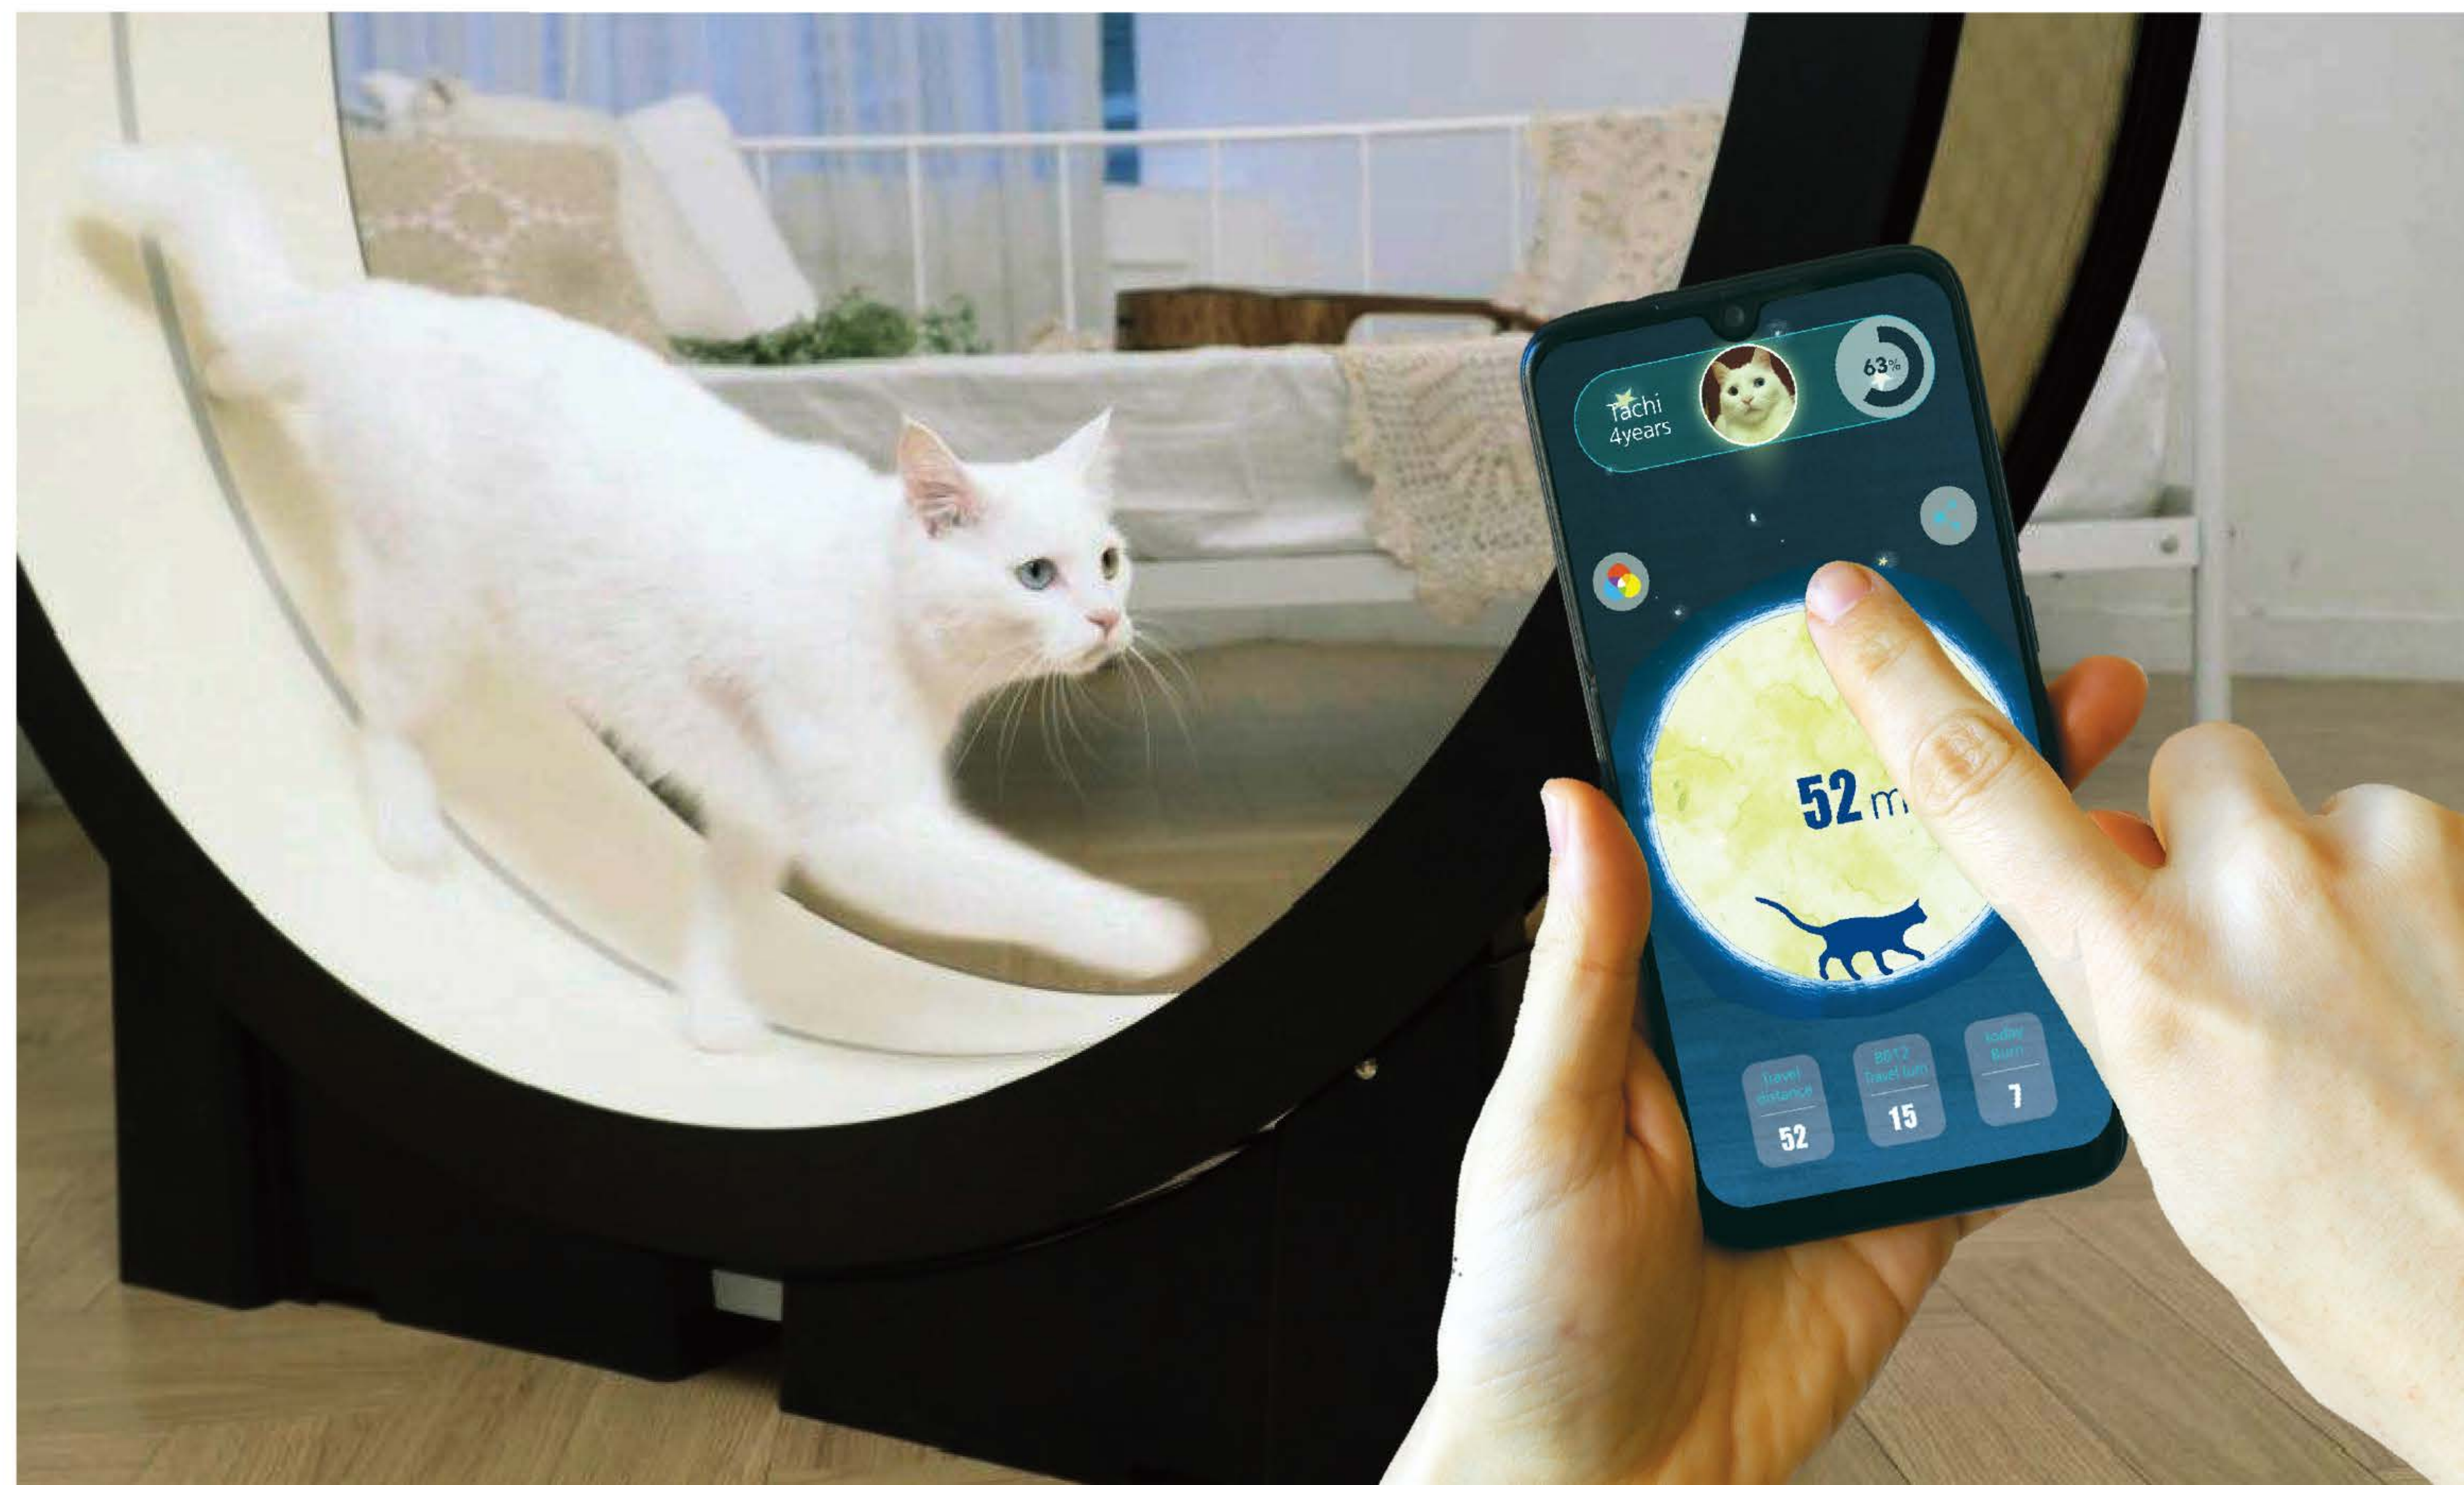

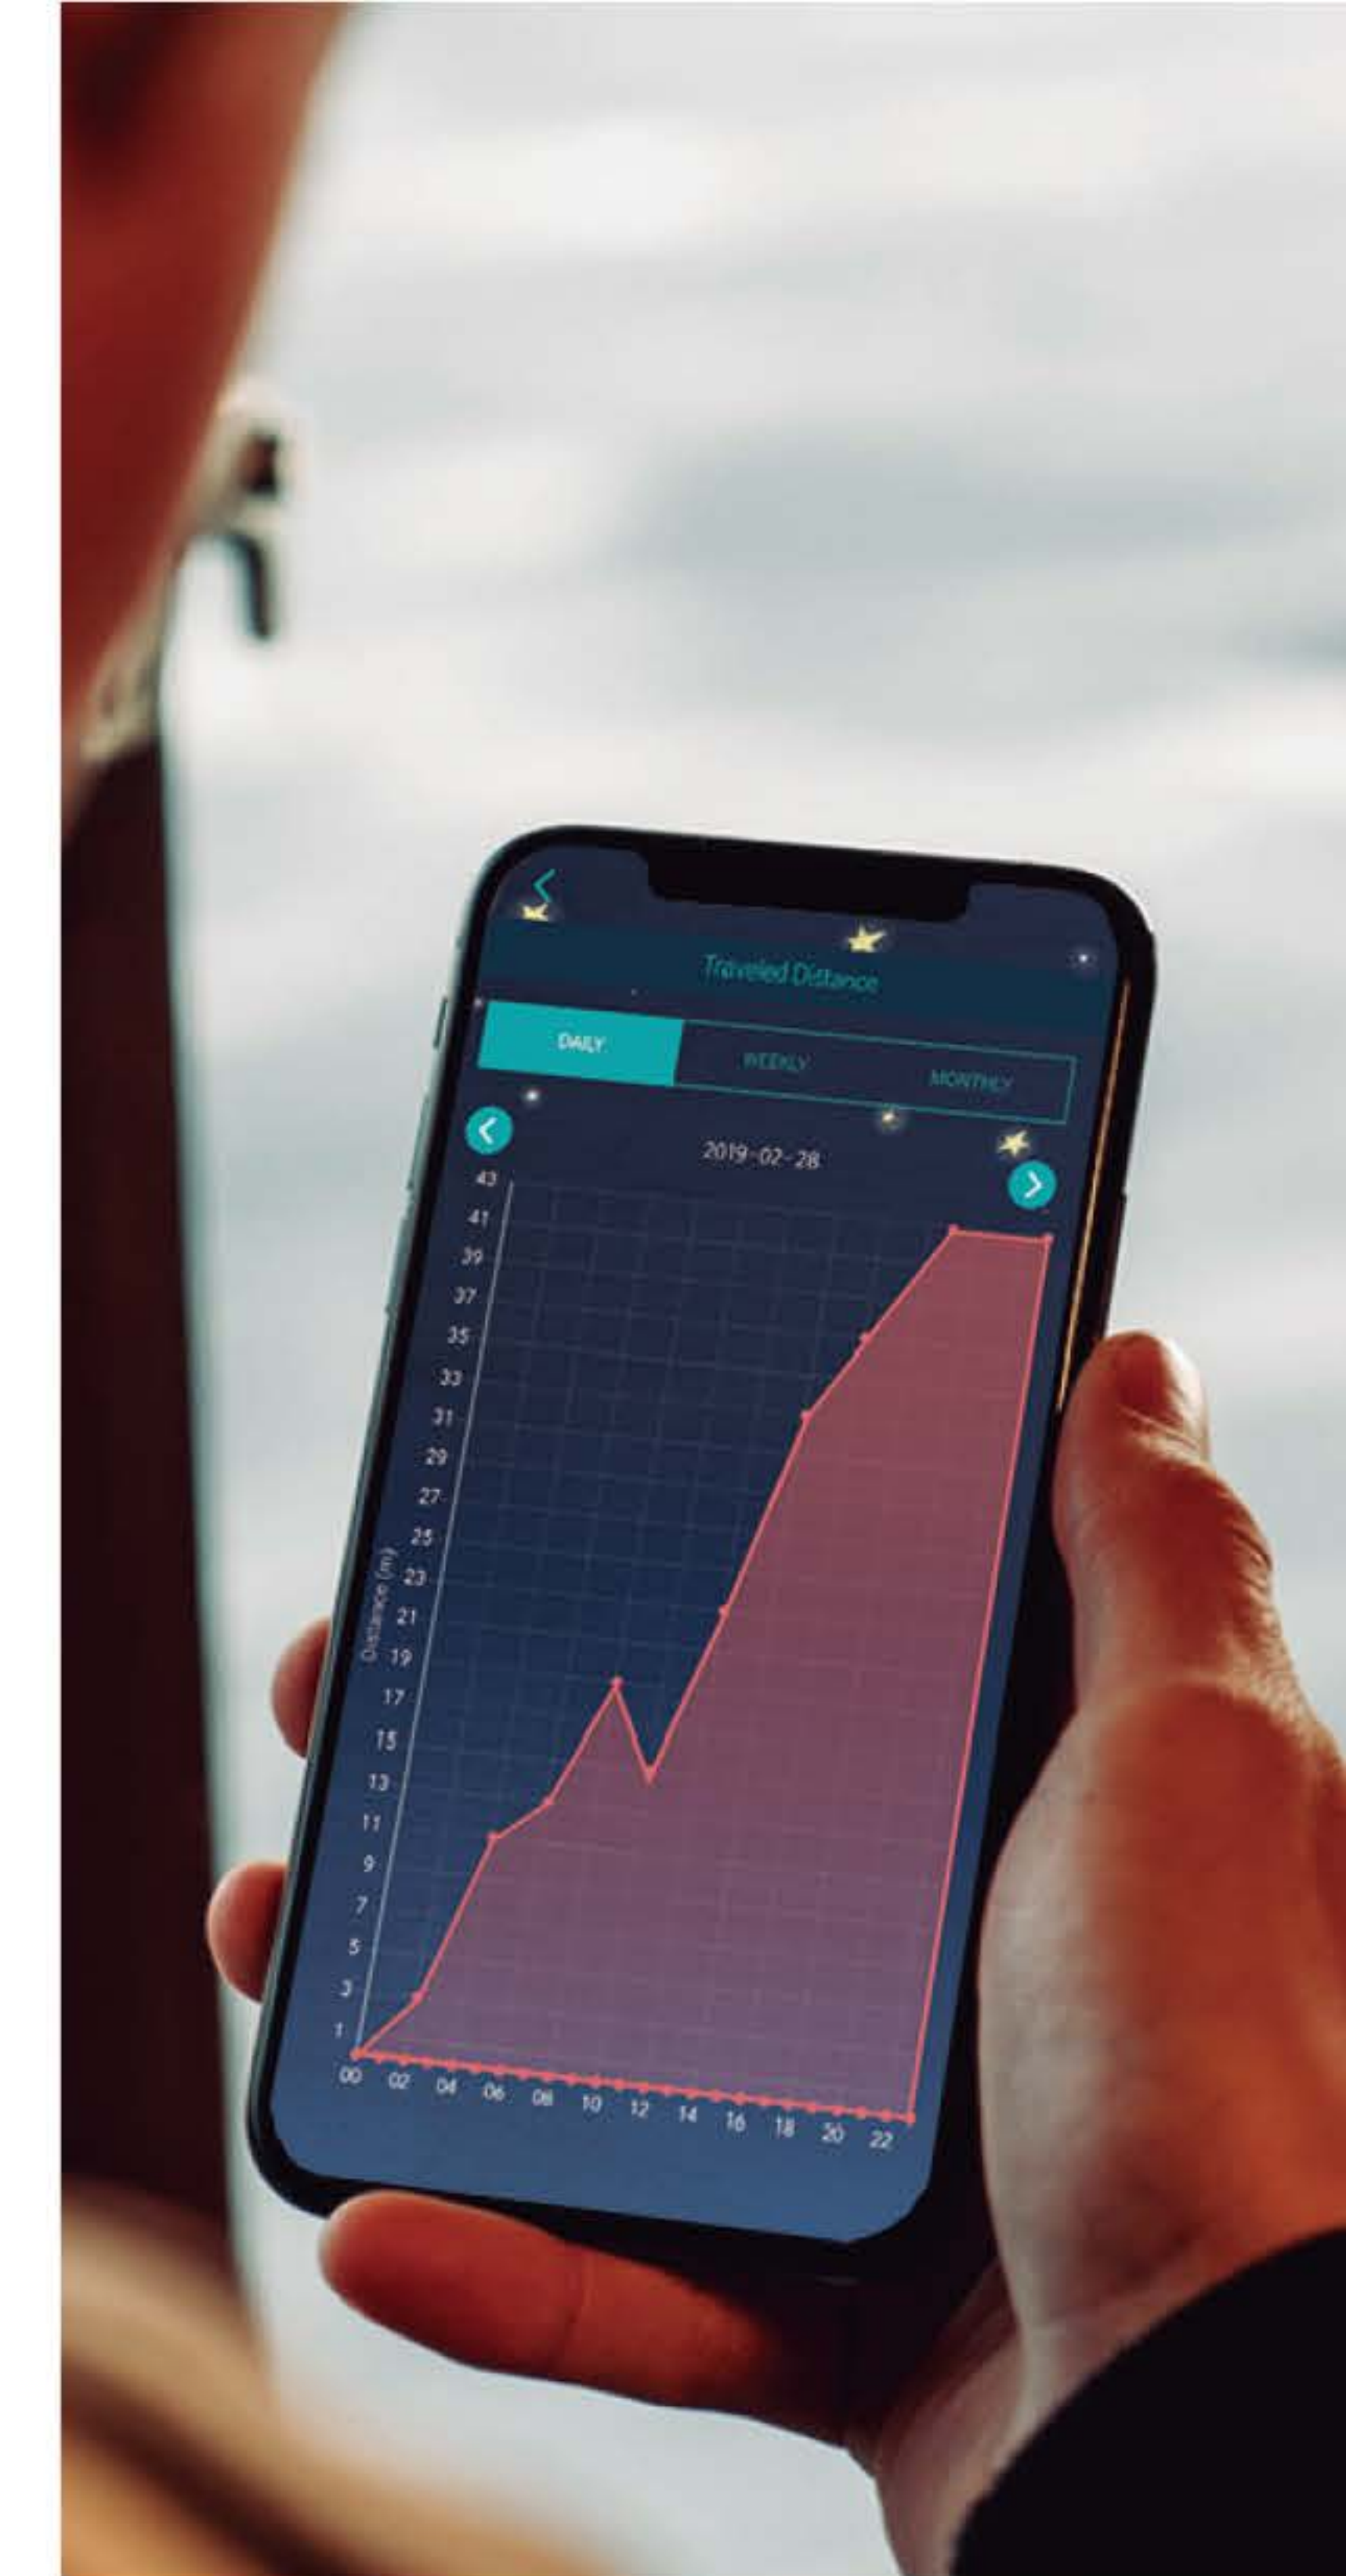

Data accumulation

All your cat's exercise data is stored daily.

Dog Health Checking Pee Pads

A pee pad that checks the dog's kidney health in daily life

Pad pattern color changes by kidney disease

Pink - Alkali reaction
Blue - Blood reaction

NON

Absolutely chemical-free

No chemical coagulants
No chemical absorbents
No chemical odorants

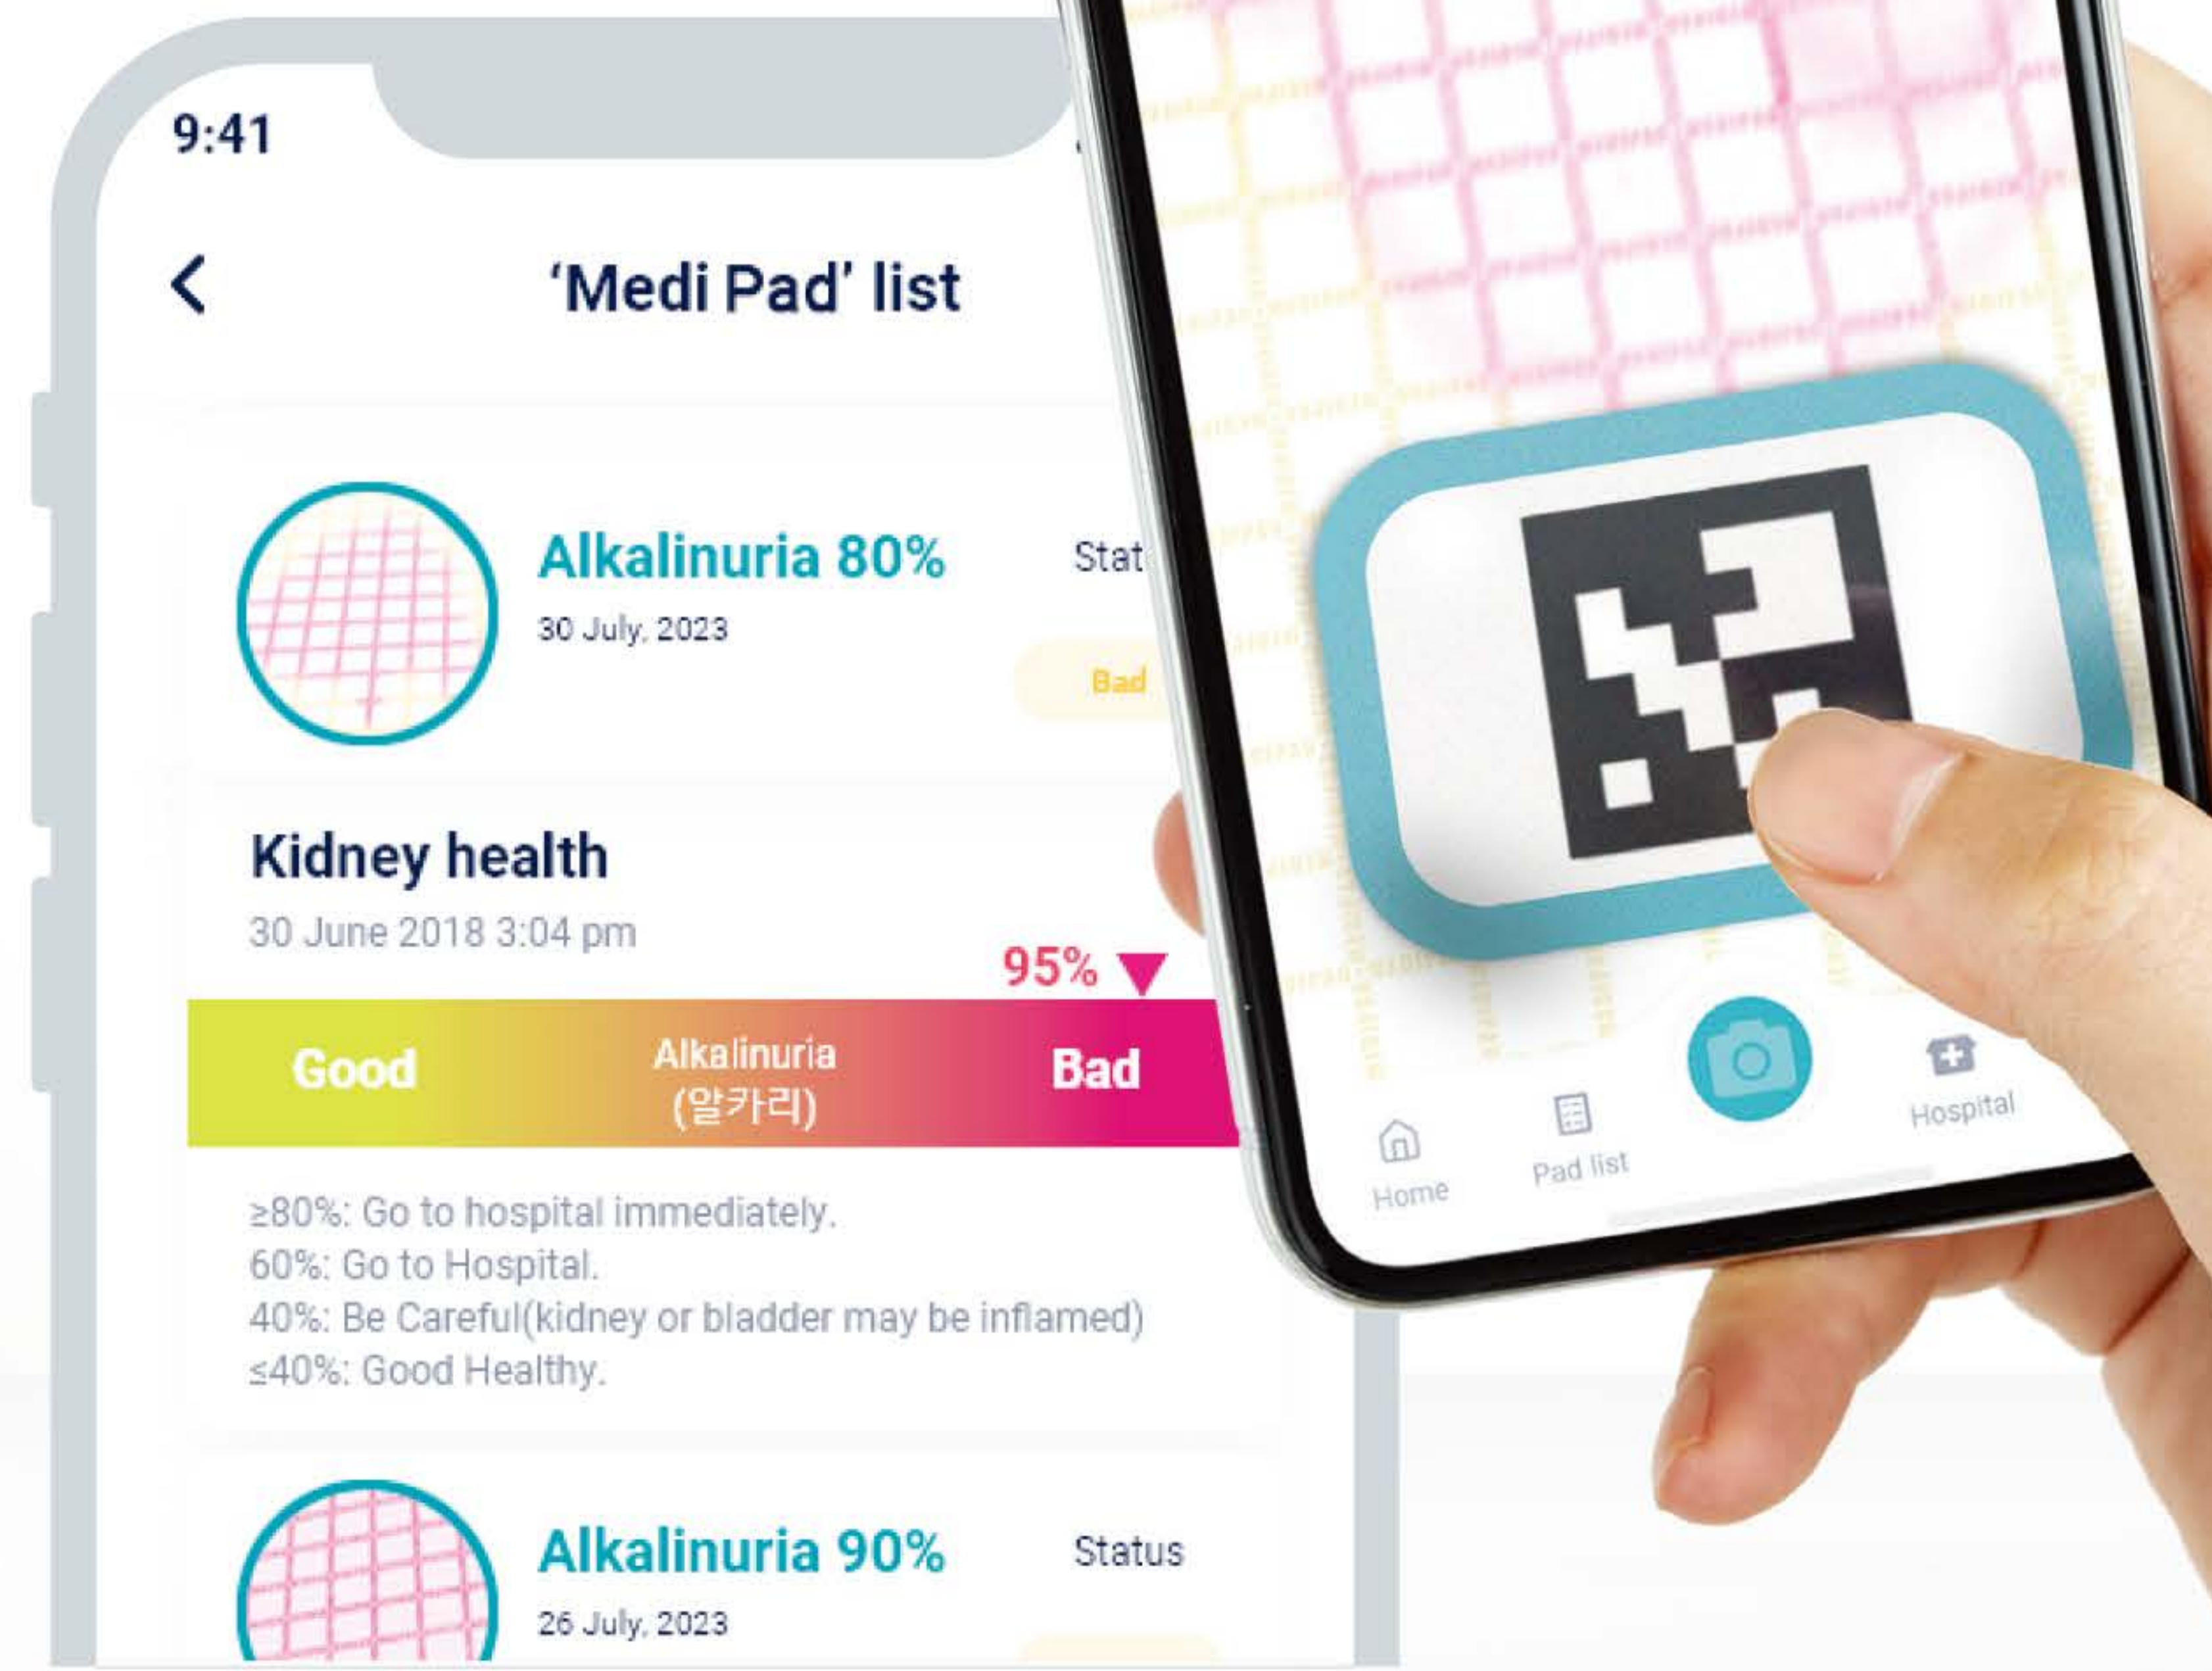

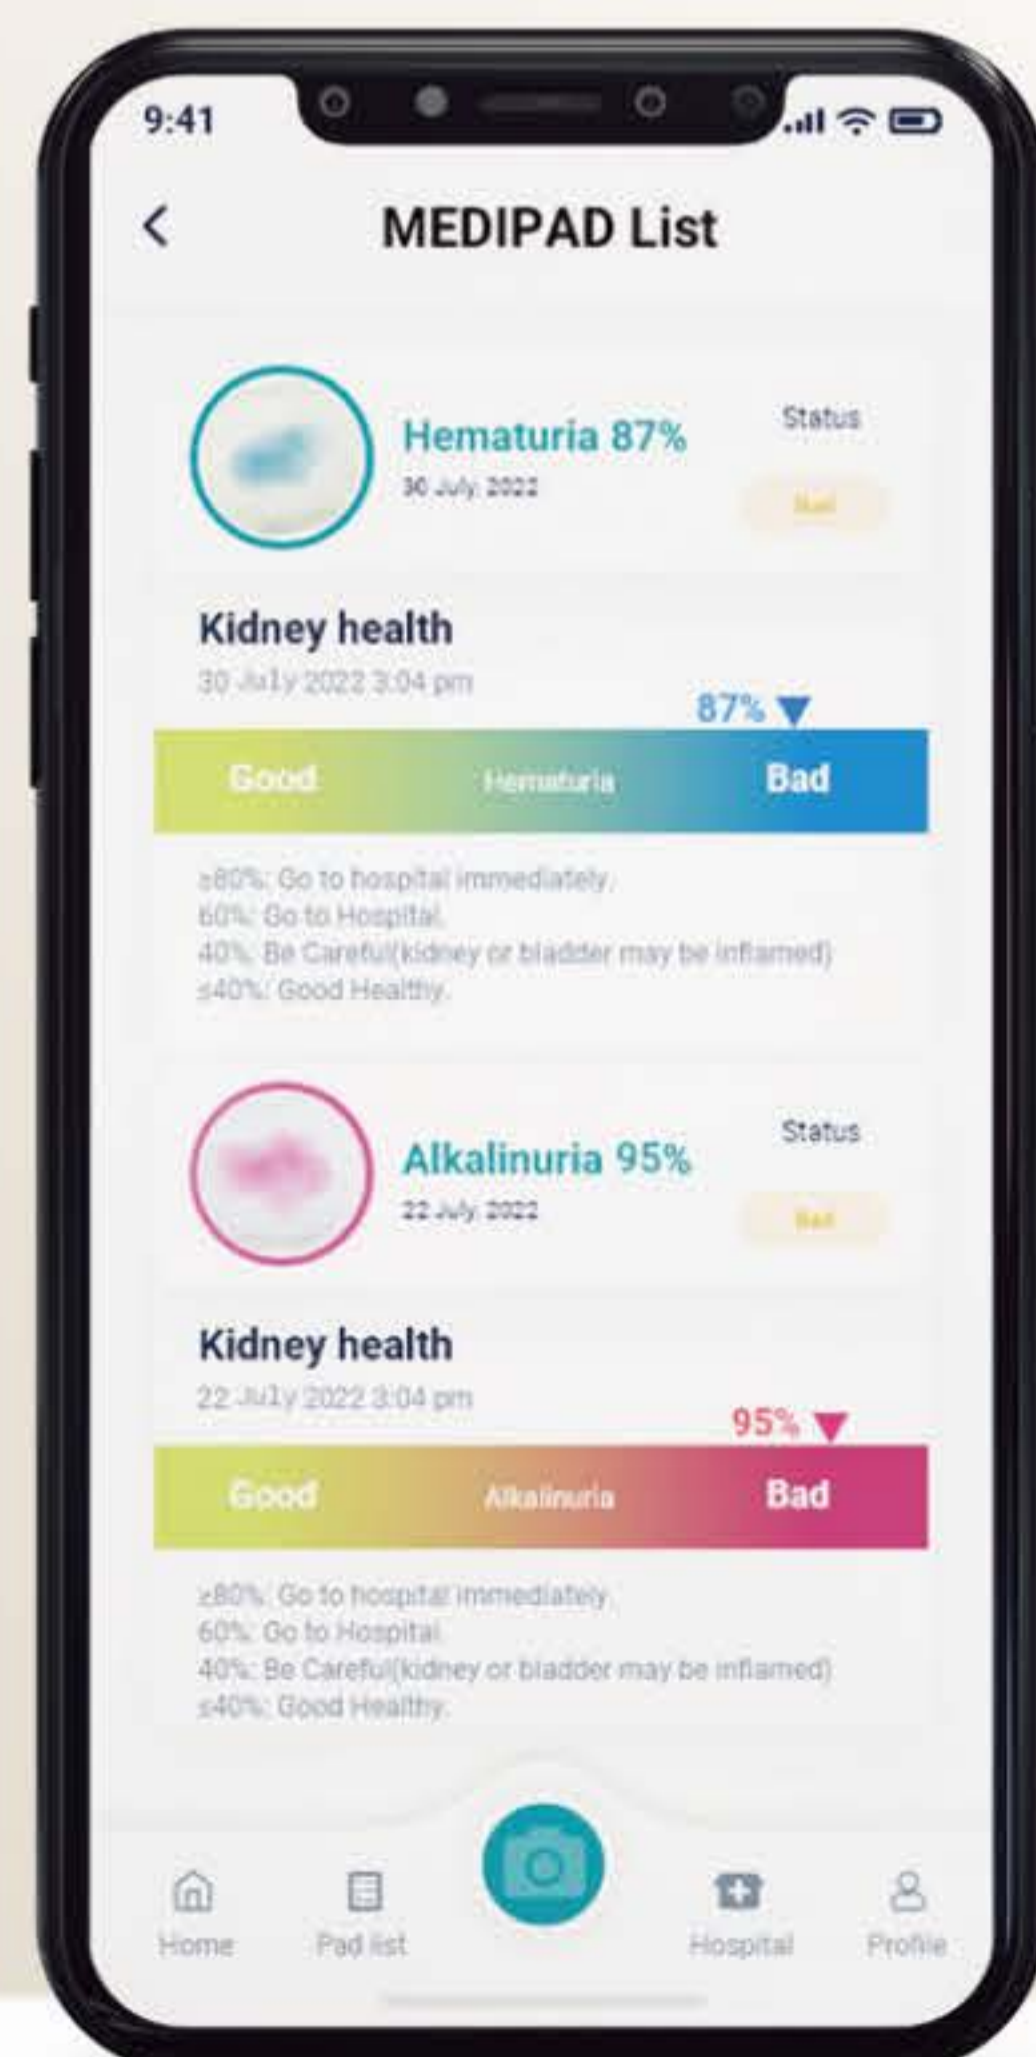

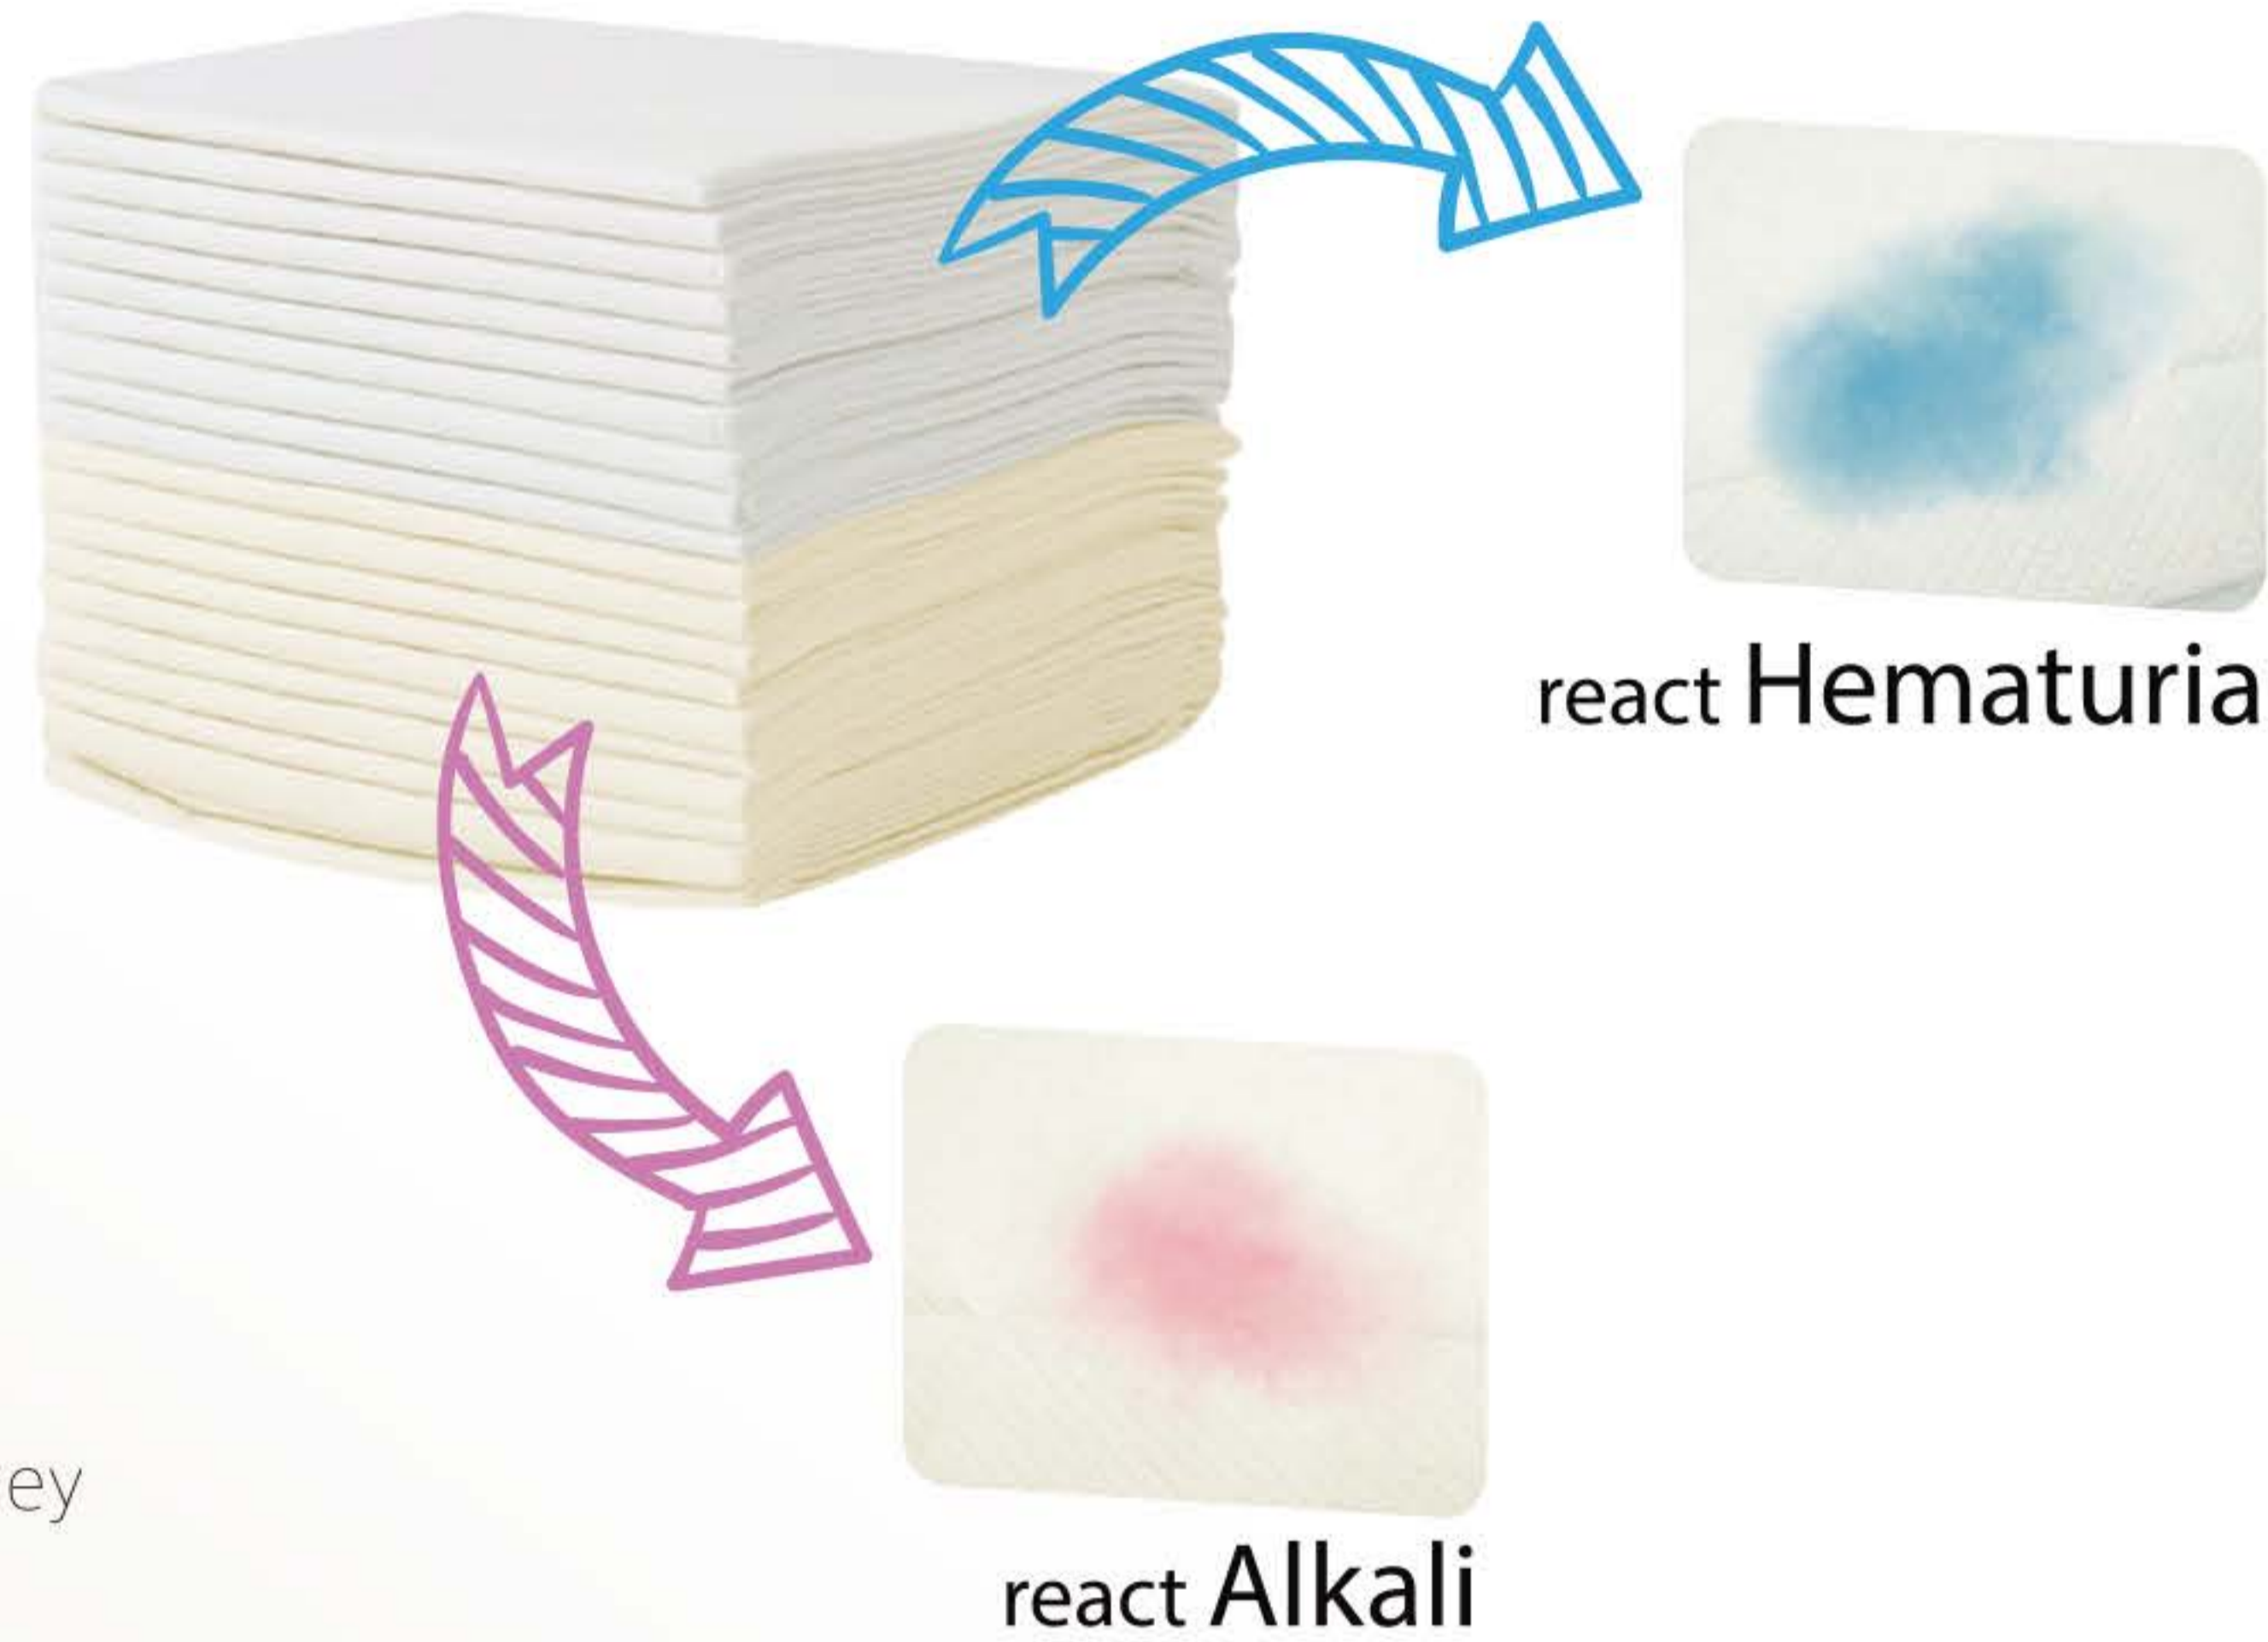

Check you dog's kidney health with our app

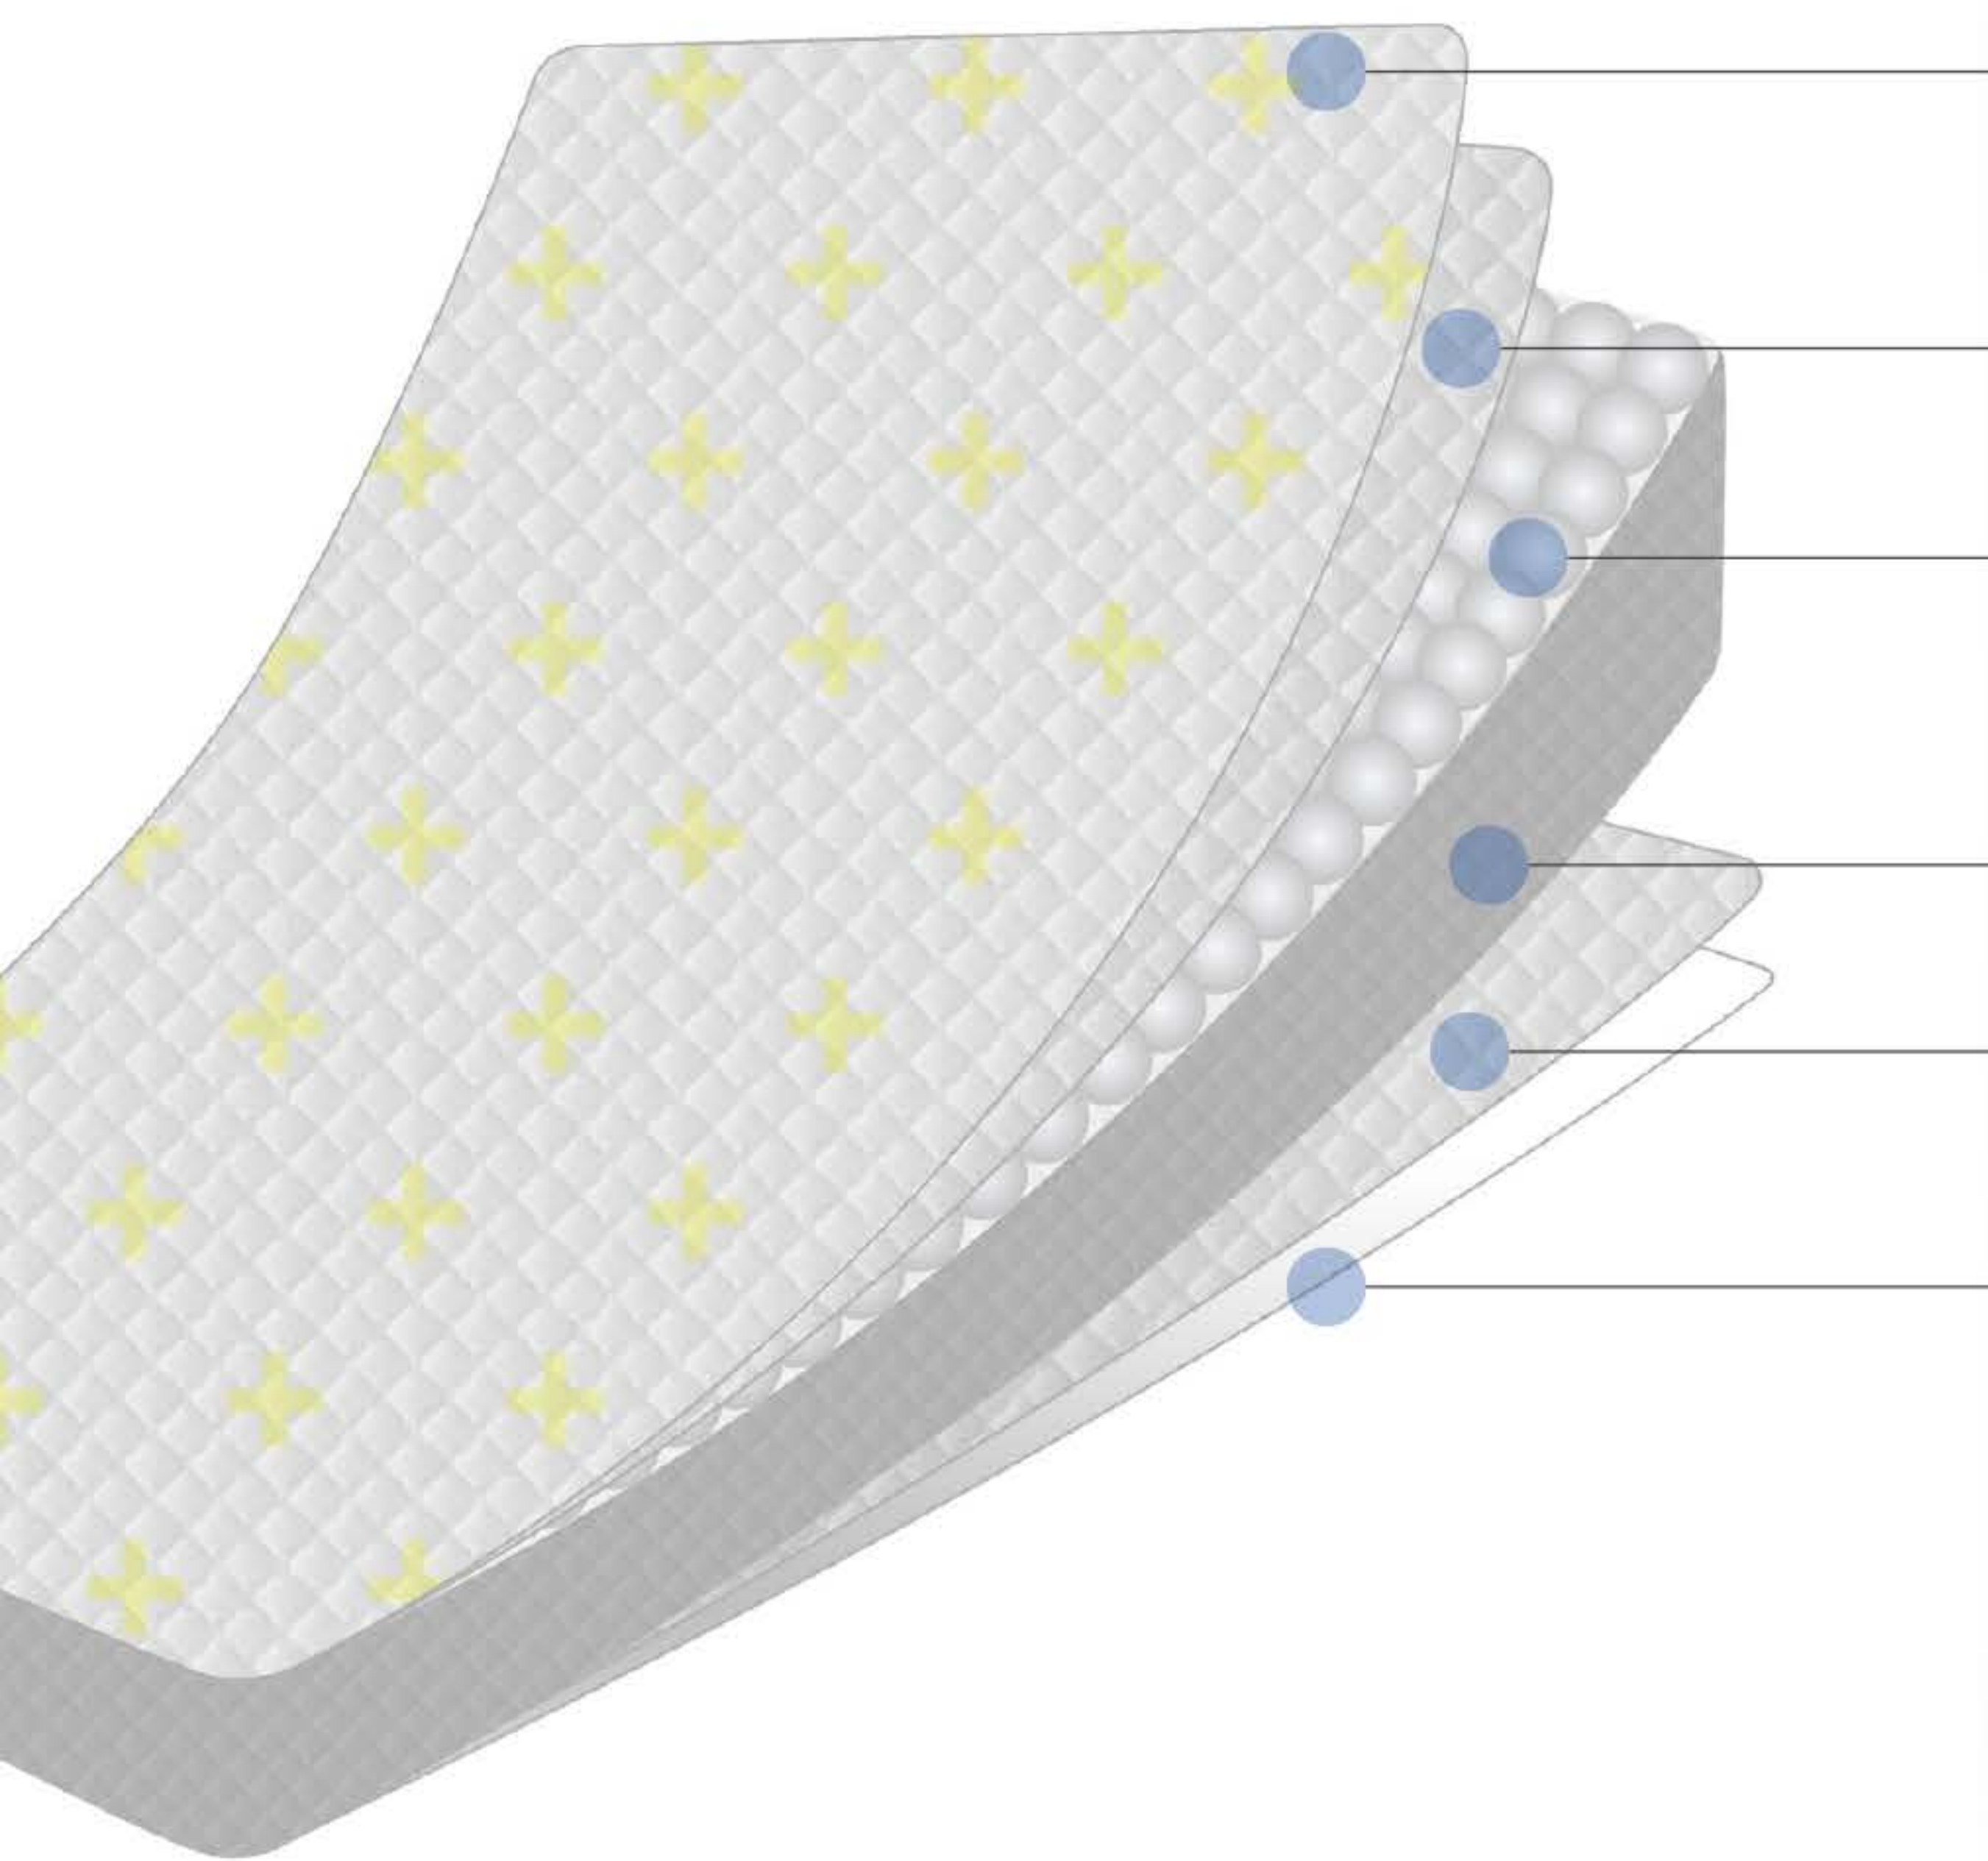

App : Medipad
You can check your dog's kidney health with MEDIPAD app.

PE waterproof film

Excellent waterproofing PE film, the floor does not get wet.

Alkaline Urine Reaction Skin Cover

Square embossing pattern prevents urine from spreading to both sides

Compressed Square Embossed Paper

Super Absorbent Polymer(SAP)

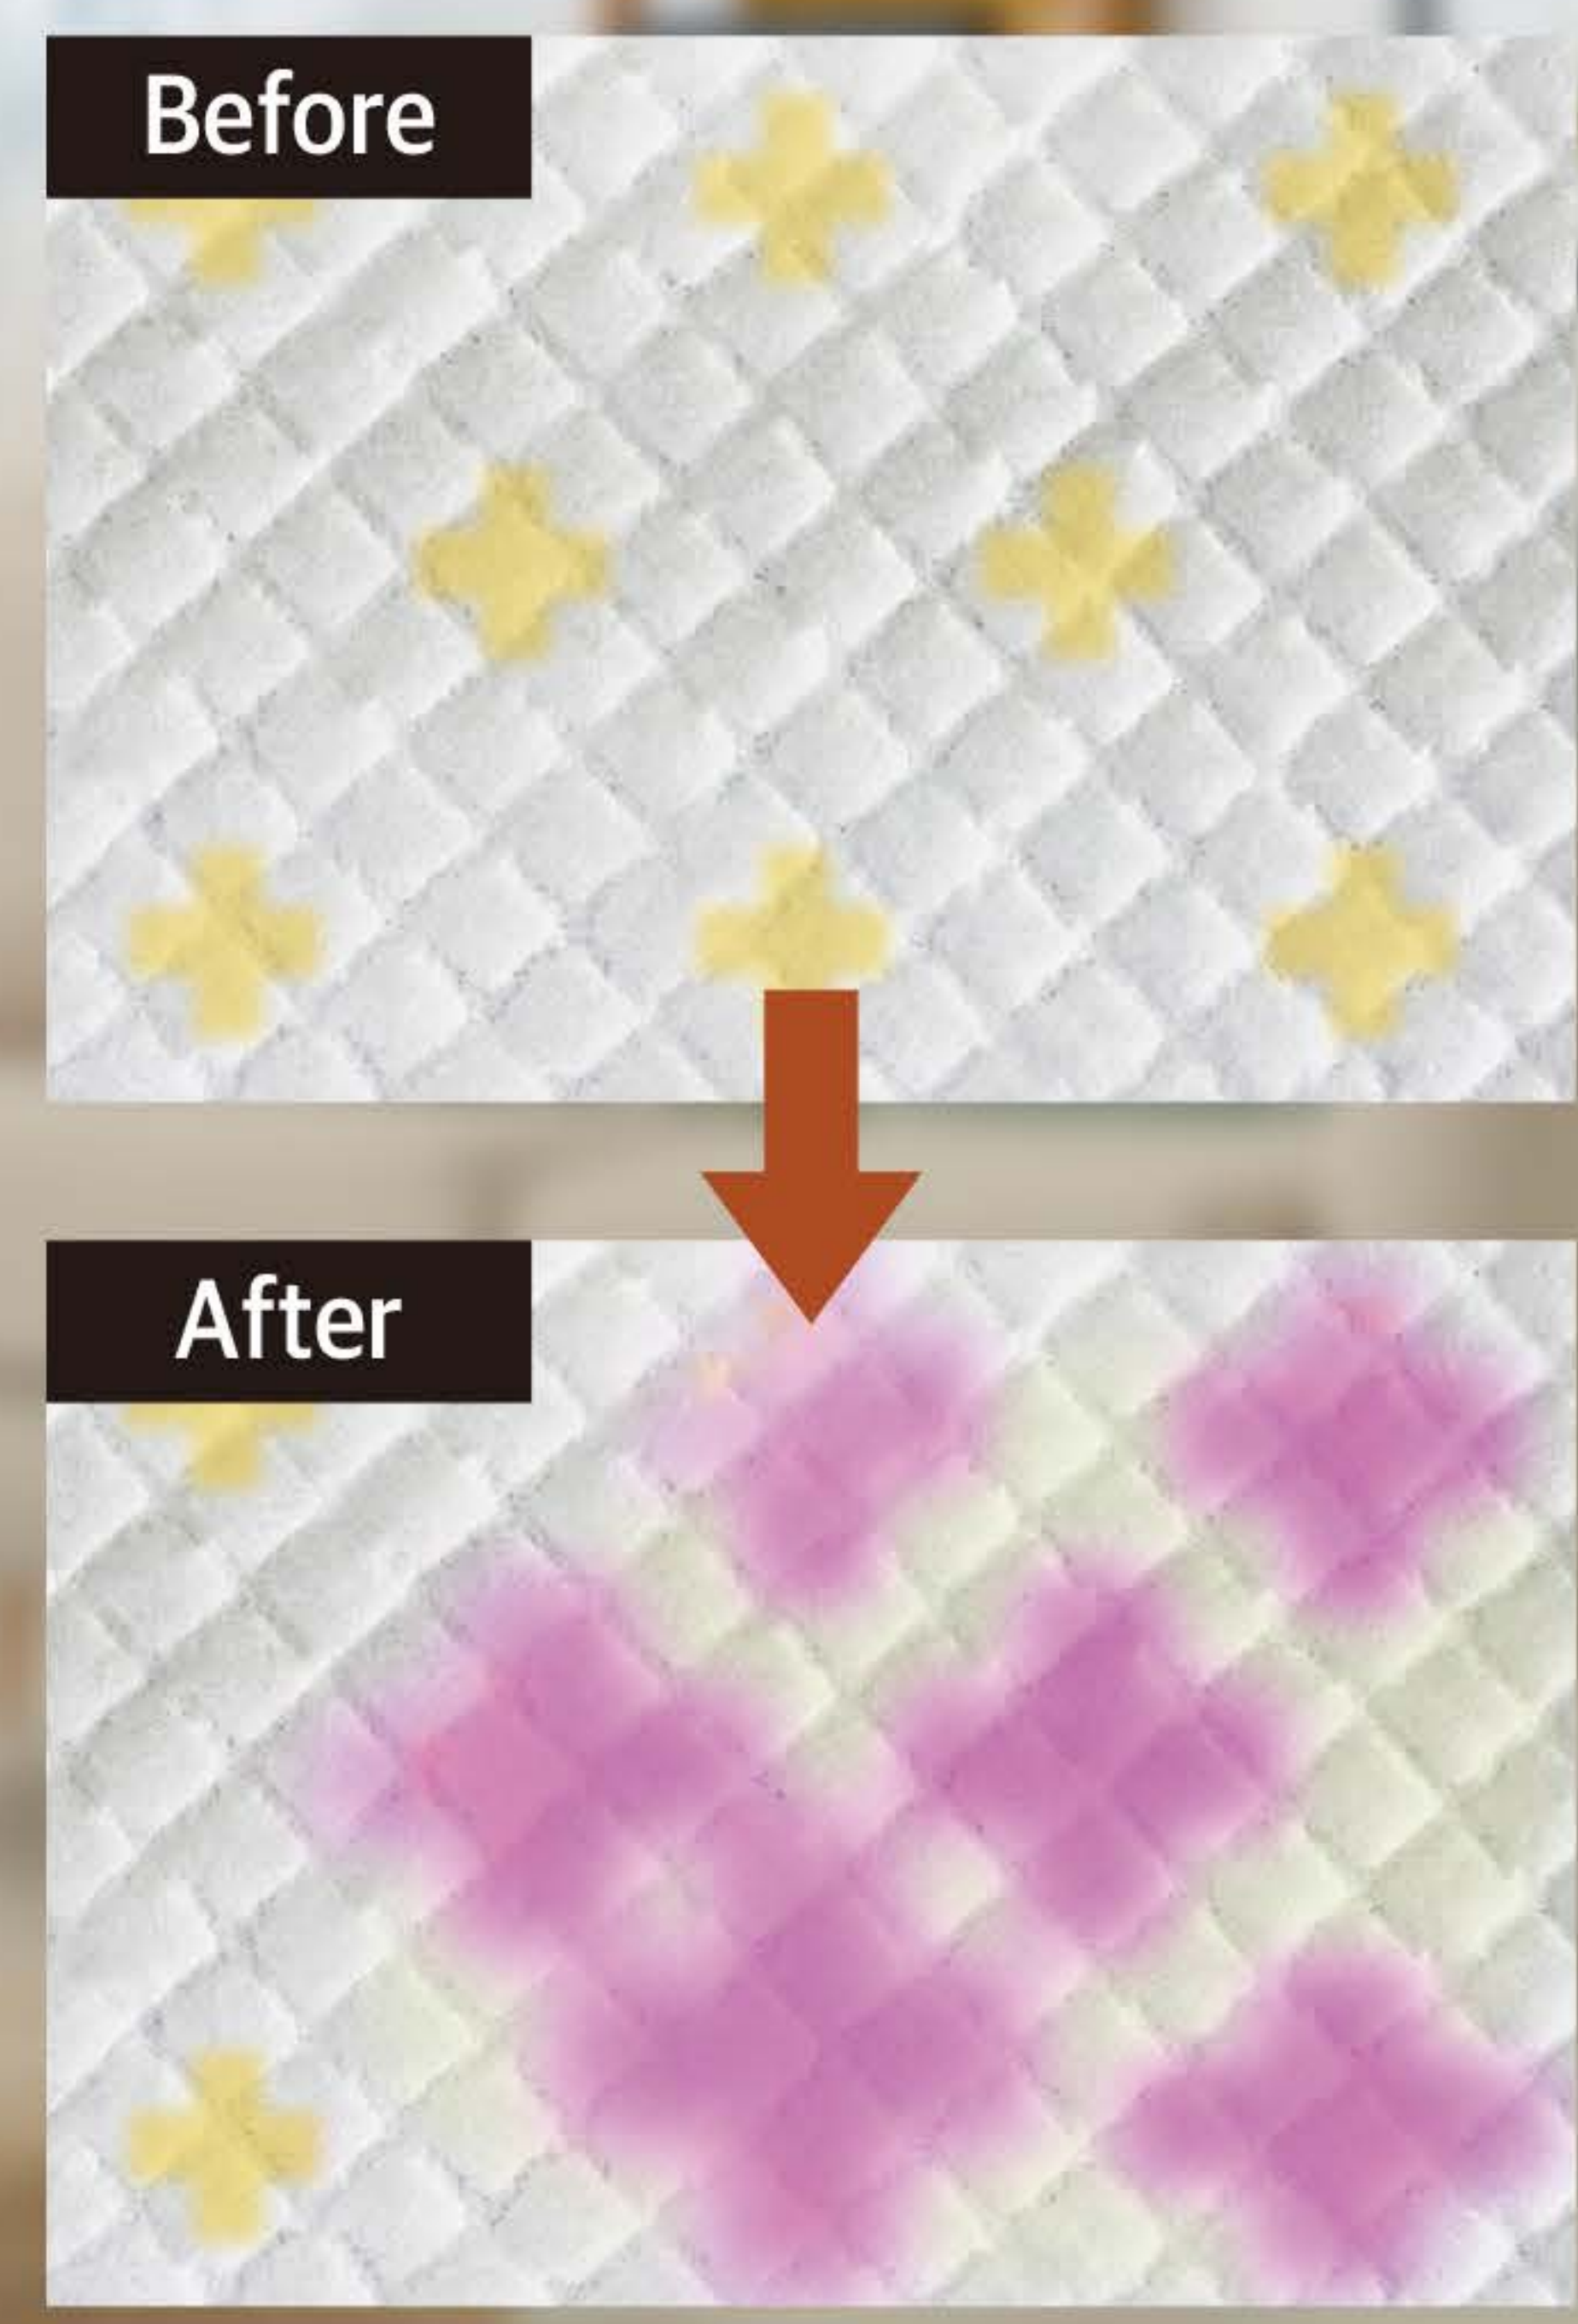

It contains 3 to 4 times more than other products, so it absorbs quickly and has a lot of

100% Pure Wood Pulp

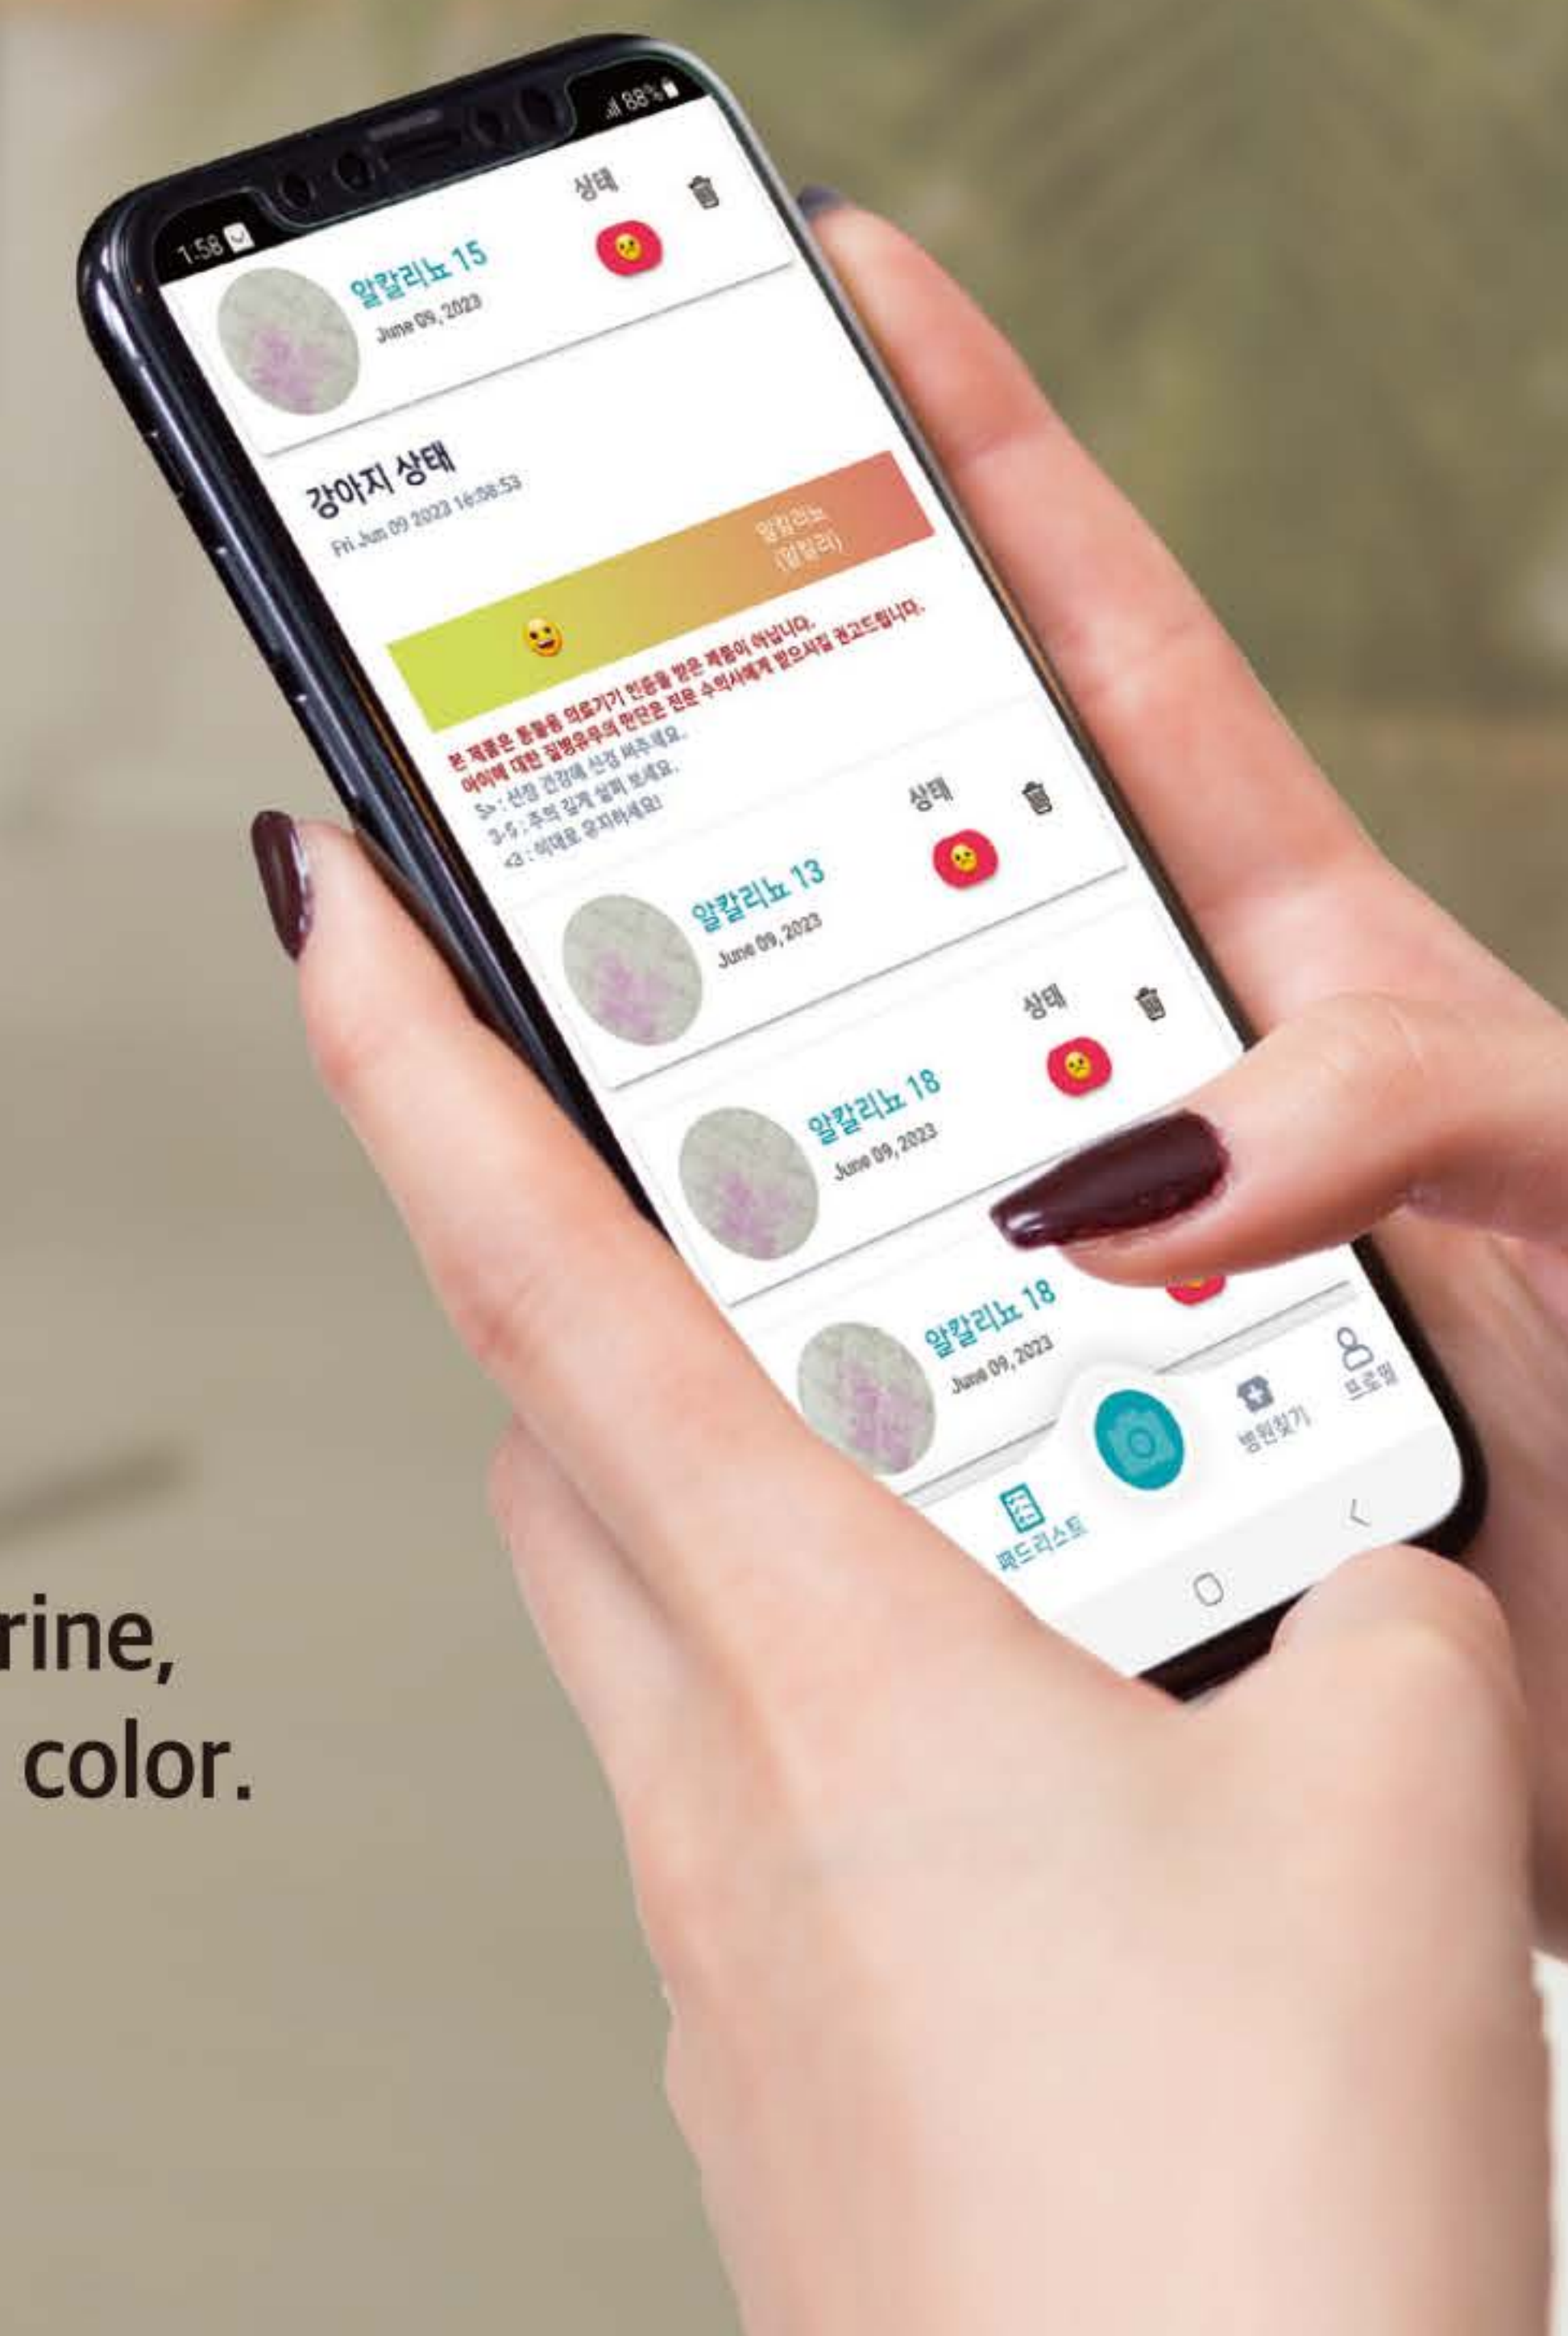

Compressed Square Embossed Paper

Waterproof Film. The floor does not get wet.

Model	MEDIPAD(MEDIPAD-A4050, MEDIPAD-A6076)
Size	<ul style="list-style-type: none"> • MEDIPAD A4050: 400mm x 500mm • MEDIPAD A6076: 600mm x 760mm
Material	<ul style="list-style-type: none"> • 6 Layers: PP + Paper + SAP + Pulp + Paper + PE • Package: PE Film
Package	<ul style="list-style-type: none"> • MEDIPAD A4050 <ul style="list-style-type: none"> - 100Pcs (Normal 90 + Test Pad 10) /Pack, - Pack: 280mm x 140mm x 320mm, Carton Box:440mm x 320mm x 320mm(3 Packs) • MEDIPAD A6076 <ul style="list-style-type: none"> - 25Pcs (Normal 22 + Test Pad 3)/Pack, - Pack: 205mm x 160mm x 250mm, Carton Box:420mm x 260mm x 360mm(4 Packs)
Feature	<ul style="list-style-type: none"> • React Alkalinuria • Produced as an OEM in China. • MediPad is a simple urine test for dogs that checks the degree of alkalinization of their urine. Medi pad is not a kit for diagnosing diseases, nor is it for medical use. • MediPad was designed to check that dogs' urine is alkaline in the early stages due to infection with bacteria or viruses of lower urinary tract diseases (urinary tract infections, metabolic disorders, etc.)
Notice	<ul style="list-style-type: none"> • HS CODE: 9619.00

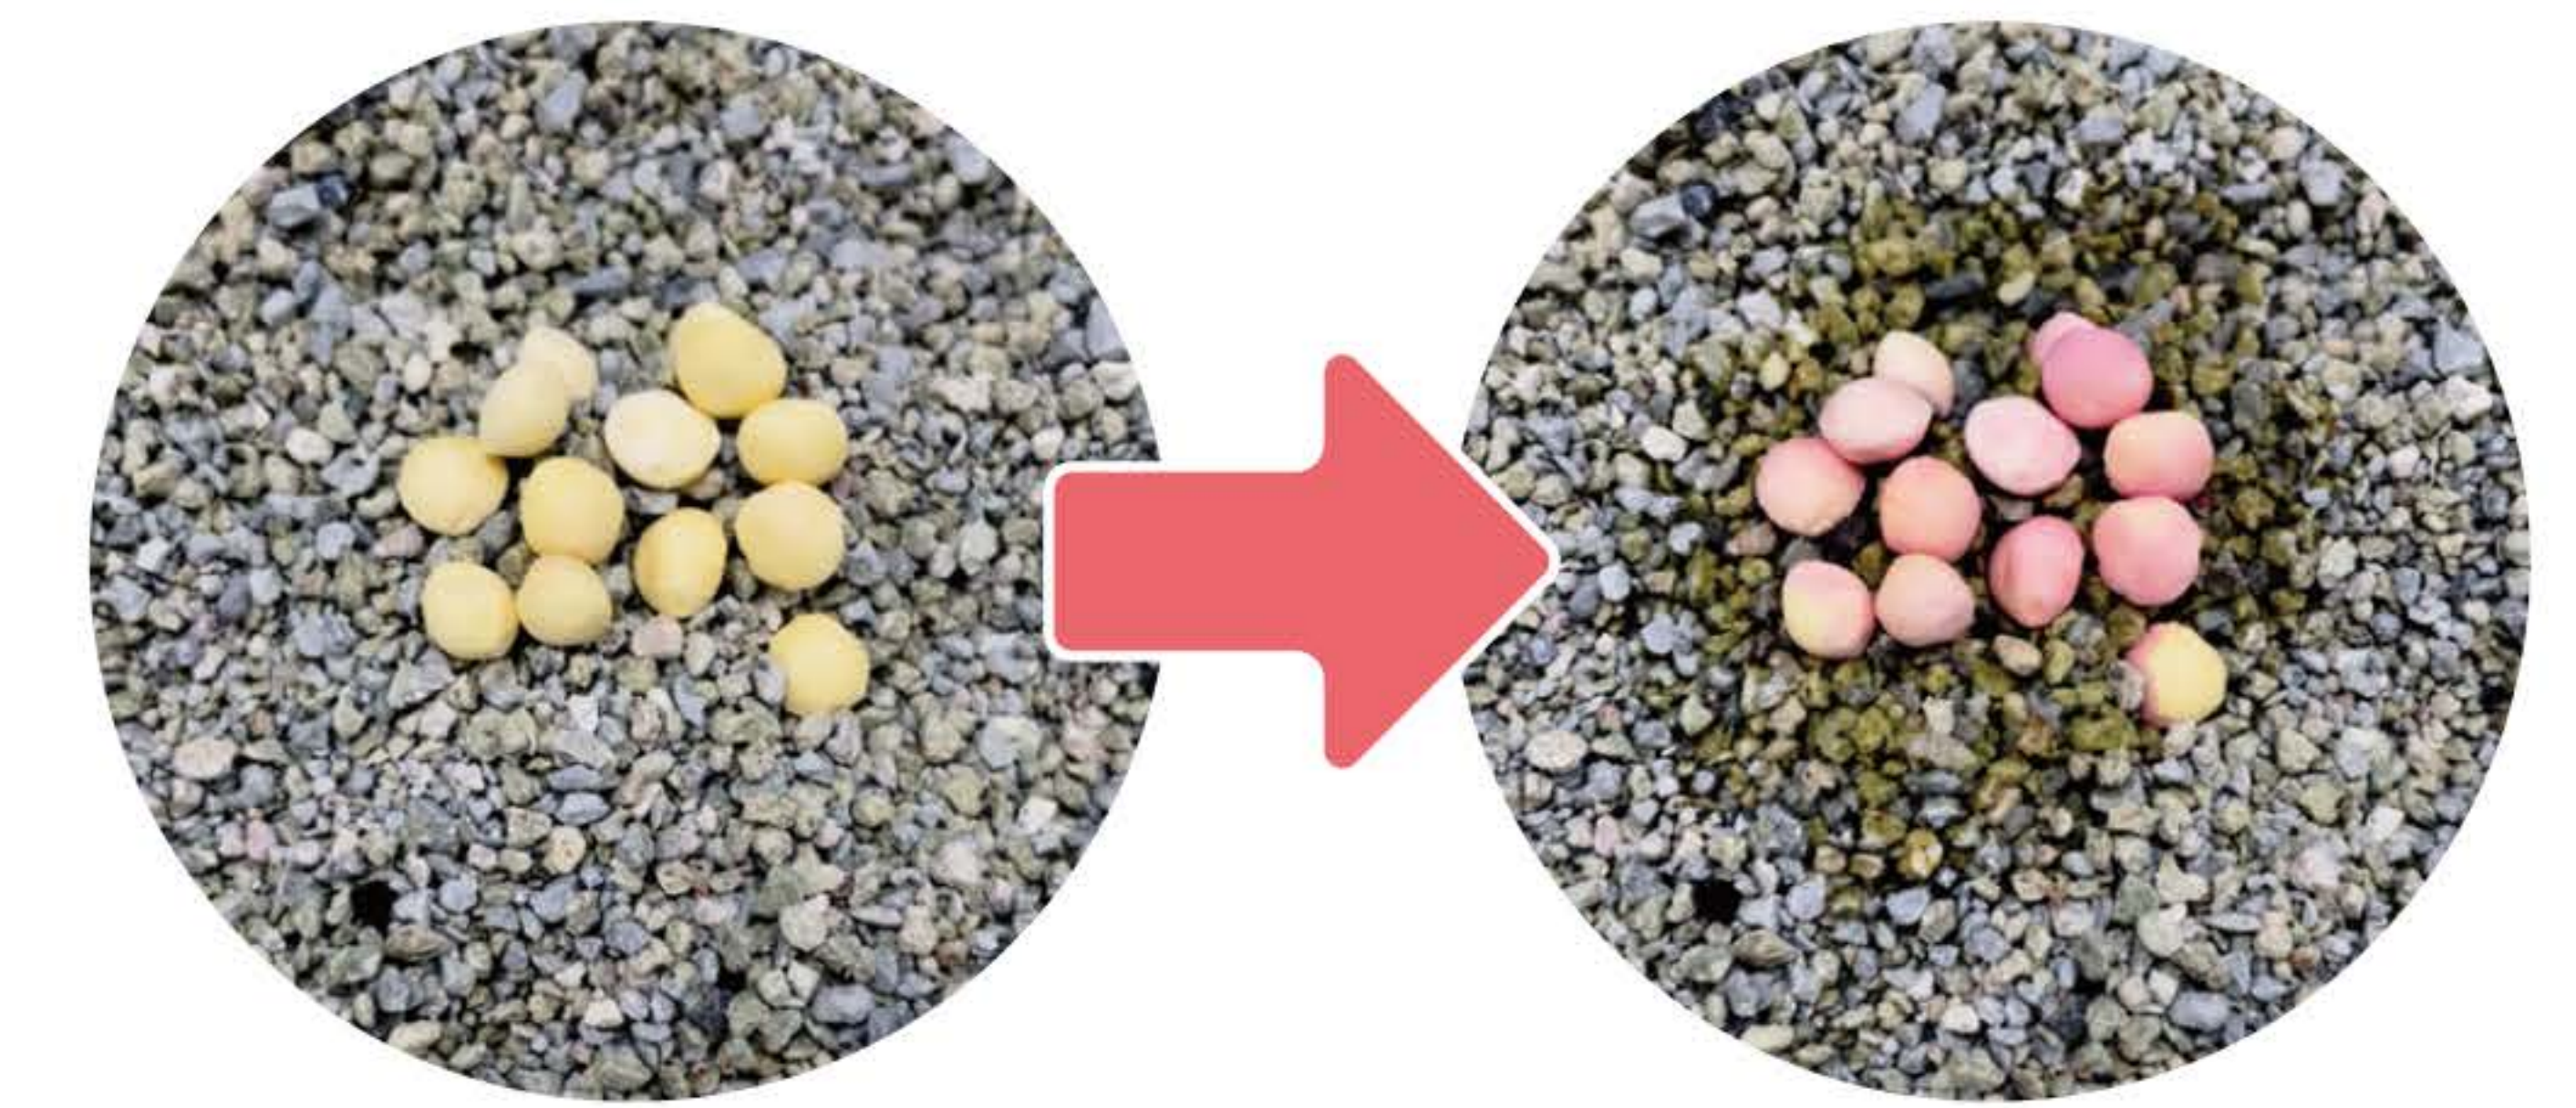

Depending on the degree of alkali in the dog's urine, the cross-shaped yellow color changes to a pink color.

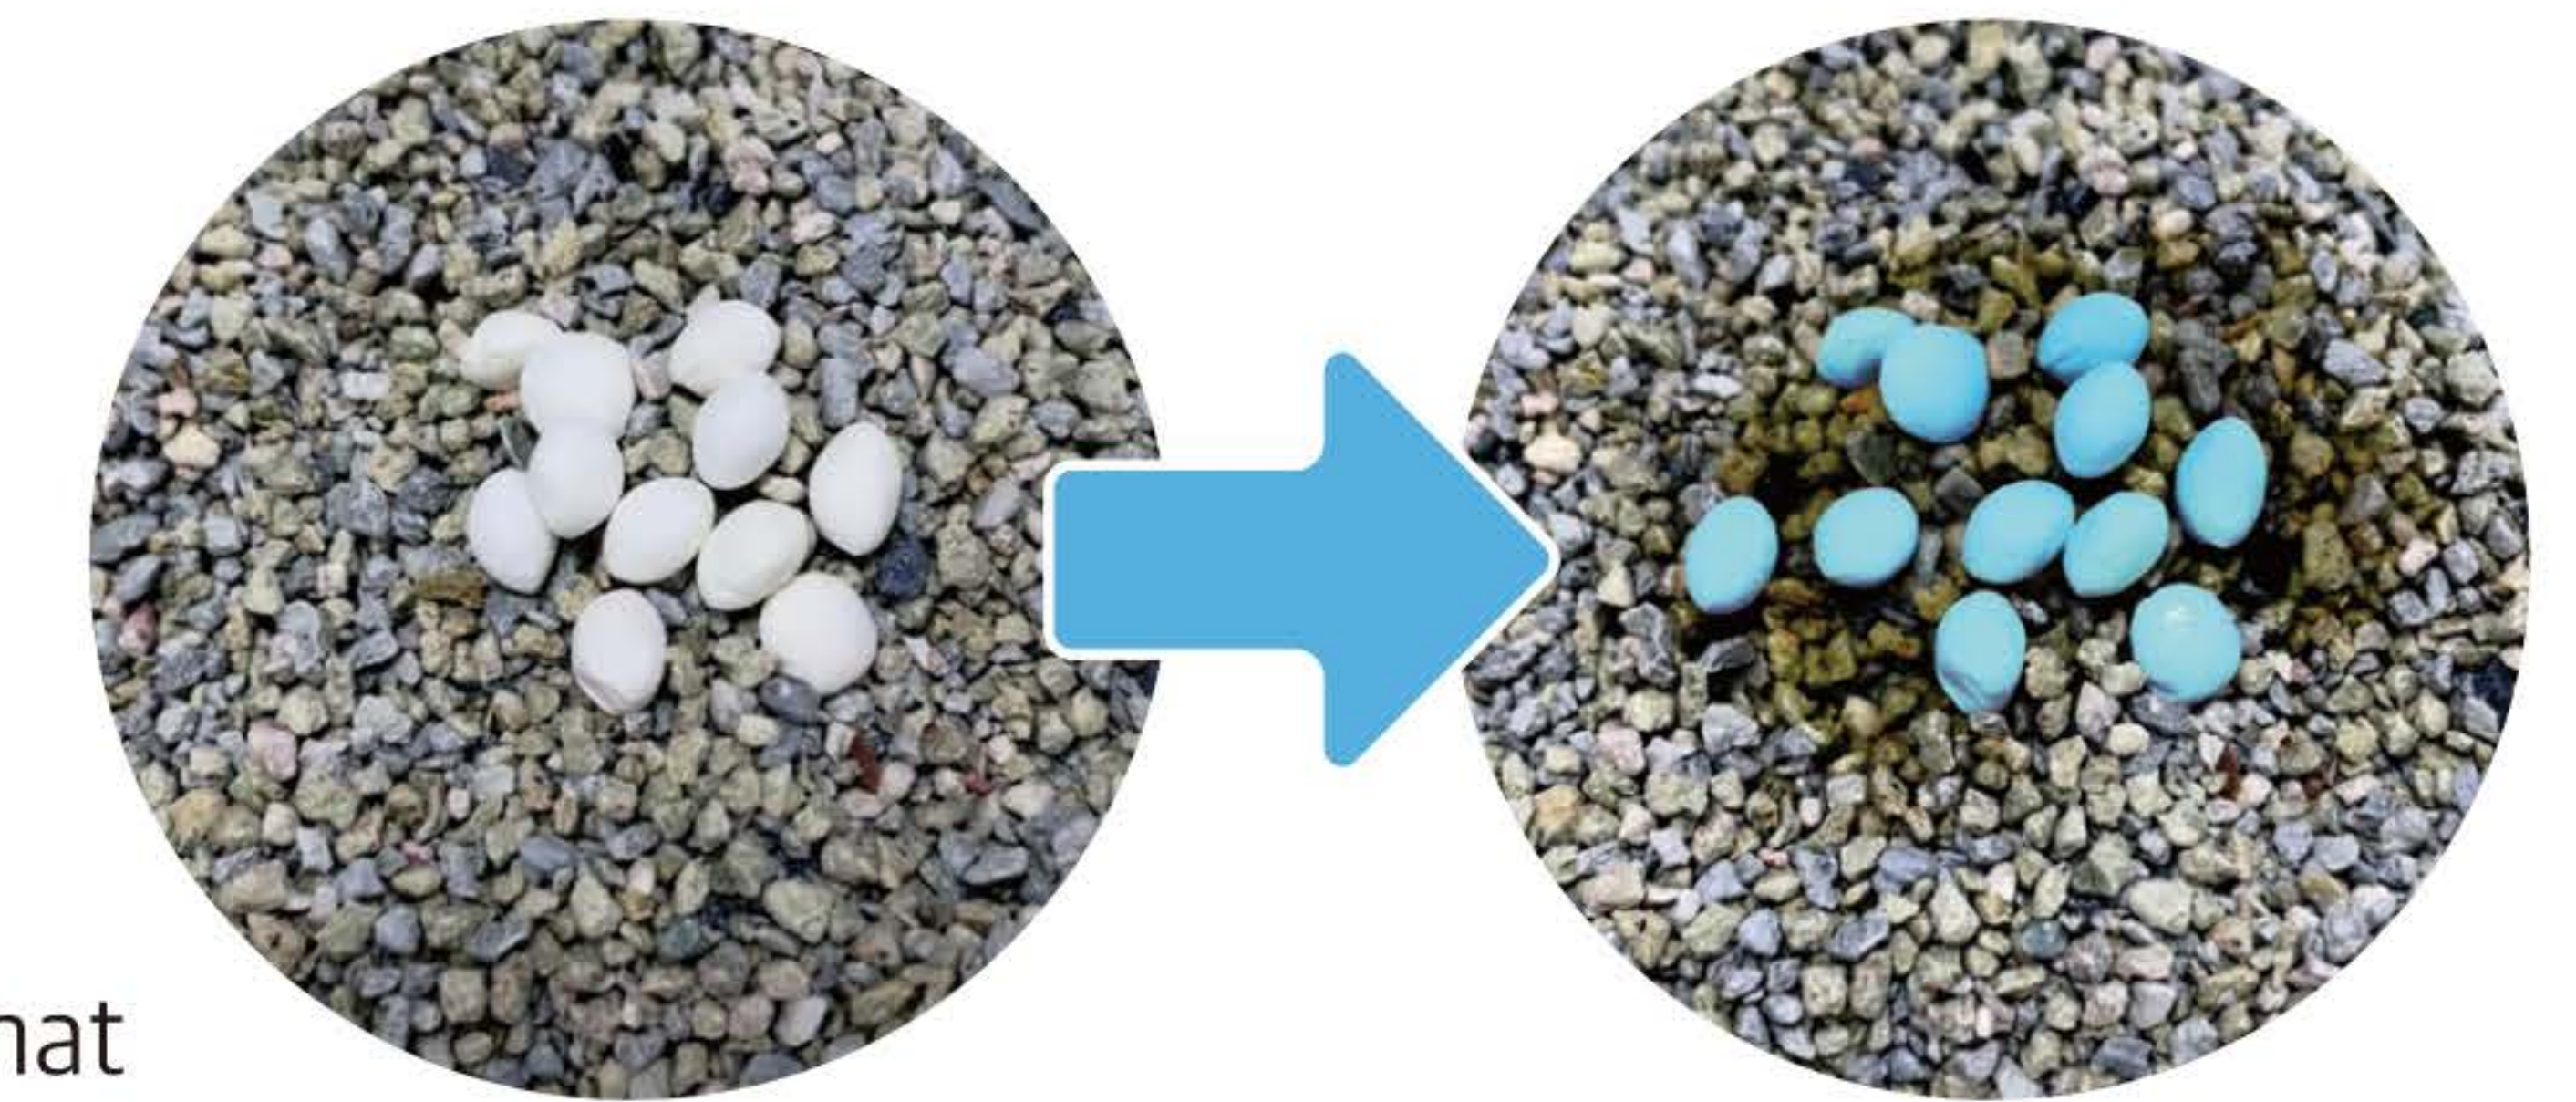

the Little Cat

Cat Health Checking Sand

Sand to check your cat's kidney health in everyday life

Alkali-pink reaction

Blood - blue reaction

Bead color changes by kidney disease

Pink - Alkali reaction
Blue - Blood reaction

NON

Absolutely chemical-free

No chemical coagulants
No chemical absorbents
No chemical odorants

Check you cat's kidney health with our app

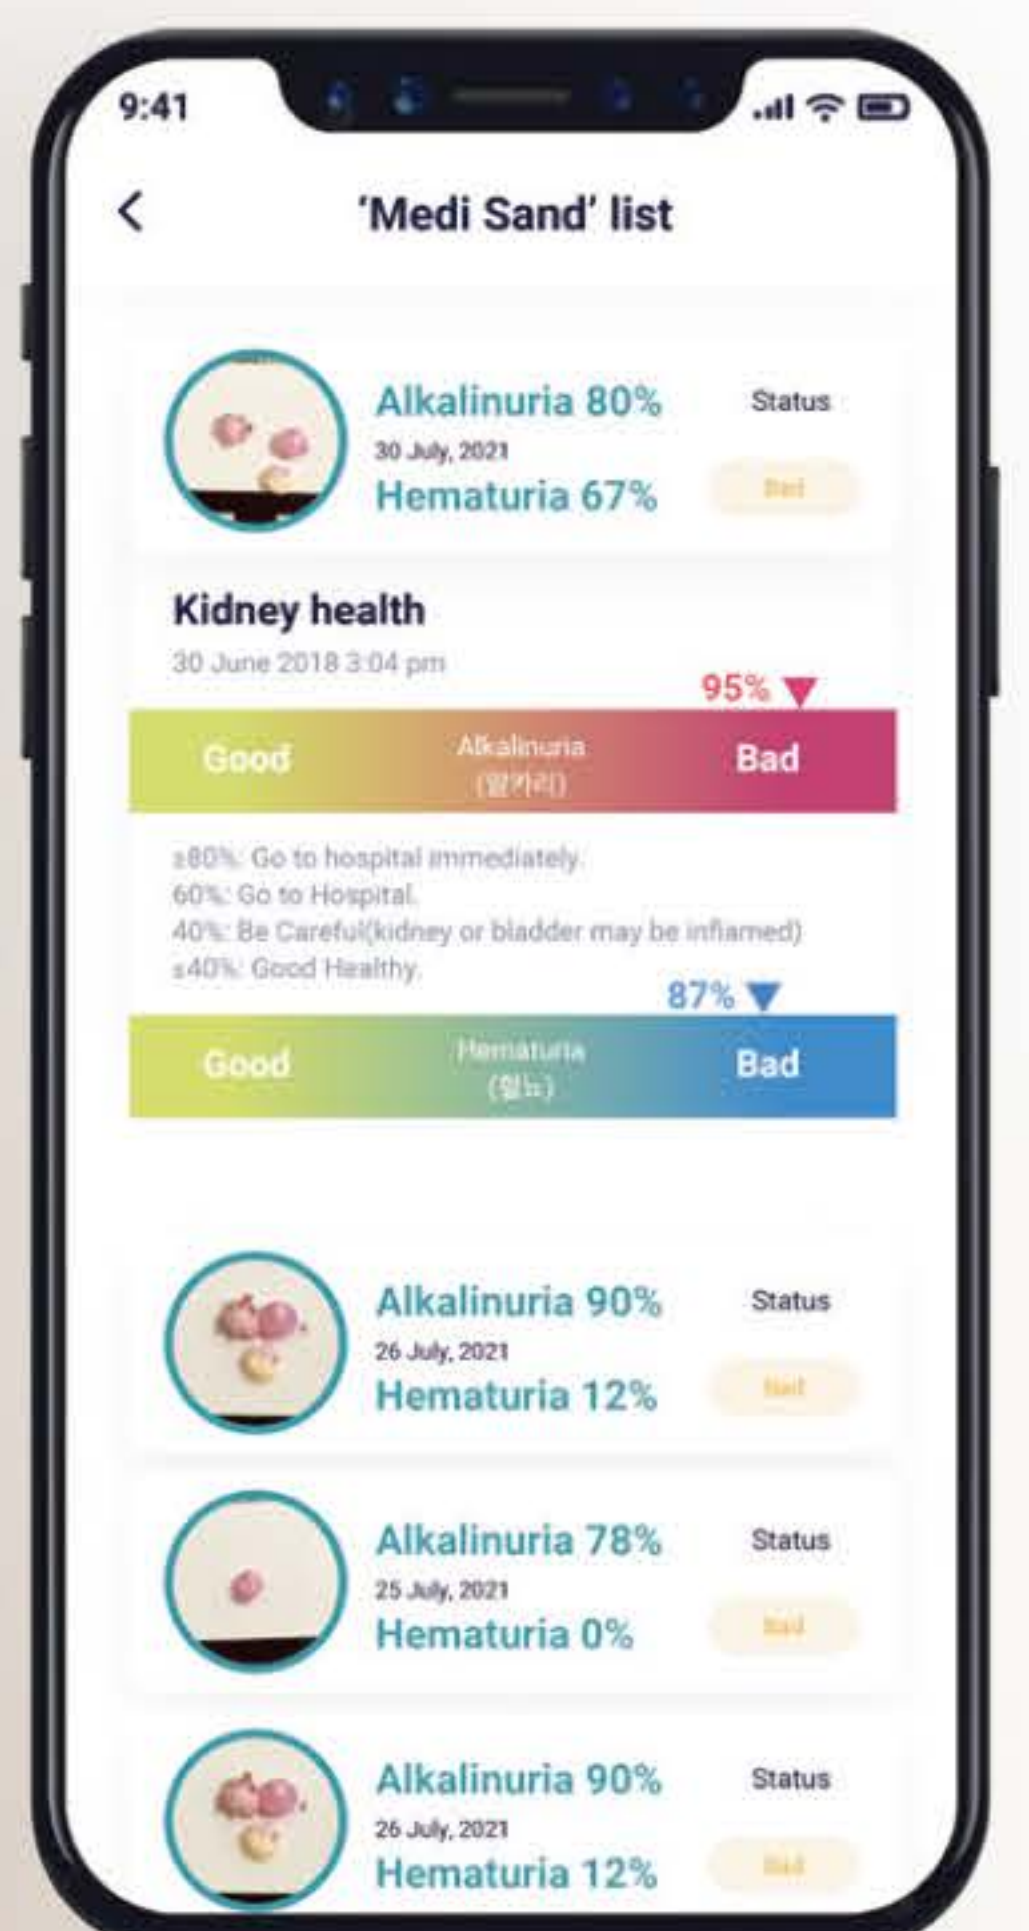

App : Medisand

Description

Mobile application-linked smart homecare cat litter that enables you to check their kidney health.

Record Data

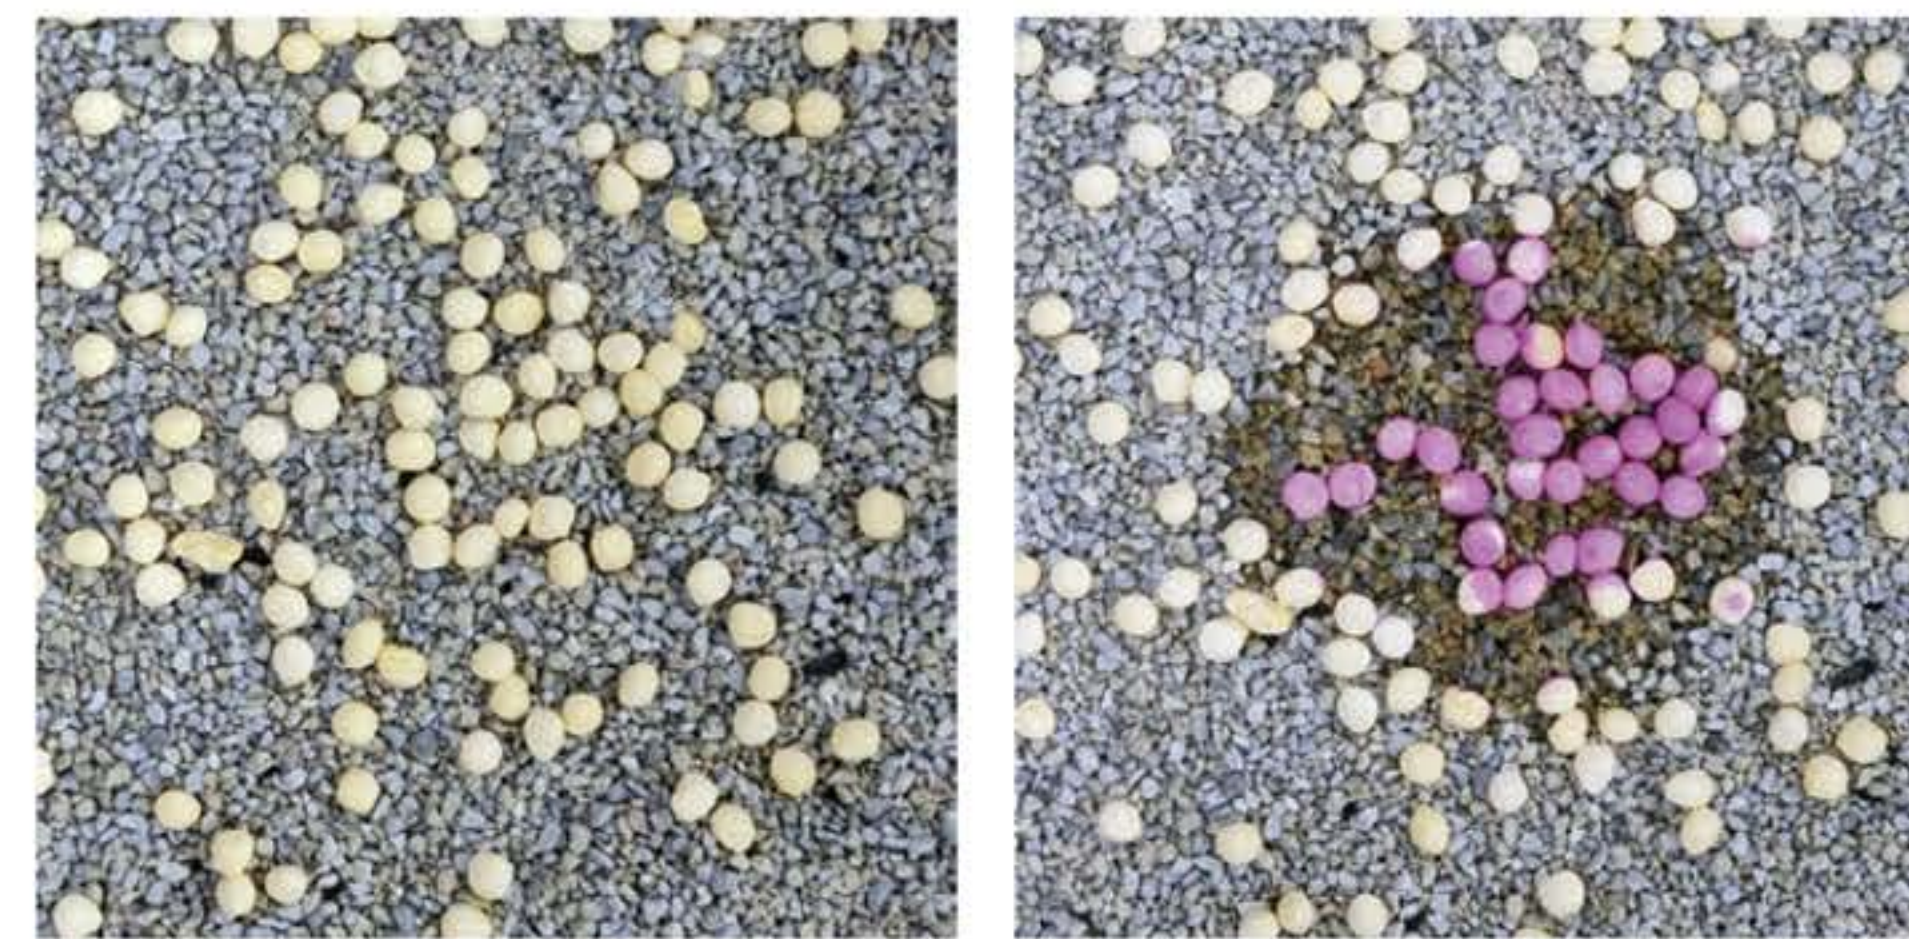

Depending on a cat's kidney health, the diagnostic bead in the sand respond to color, which enables the owners to check the level of their cat's health more accurately via a mobile application.

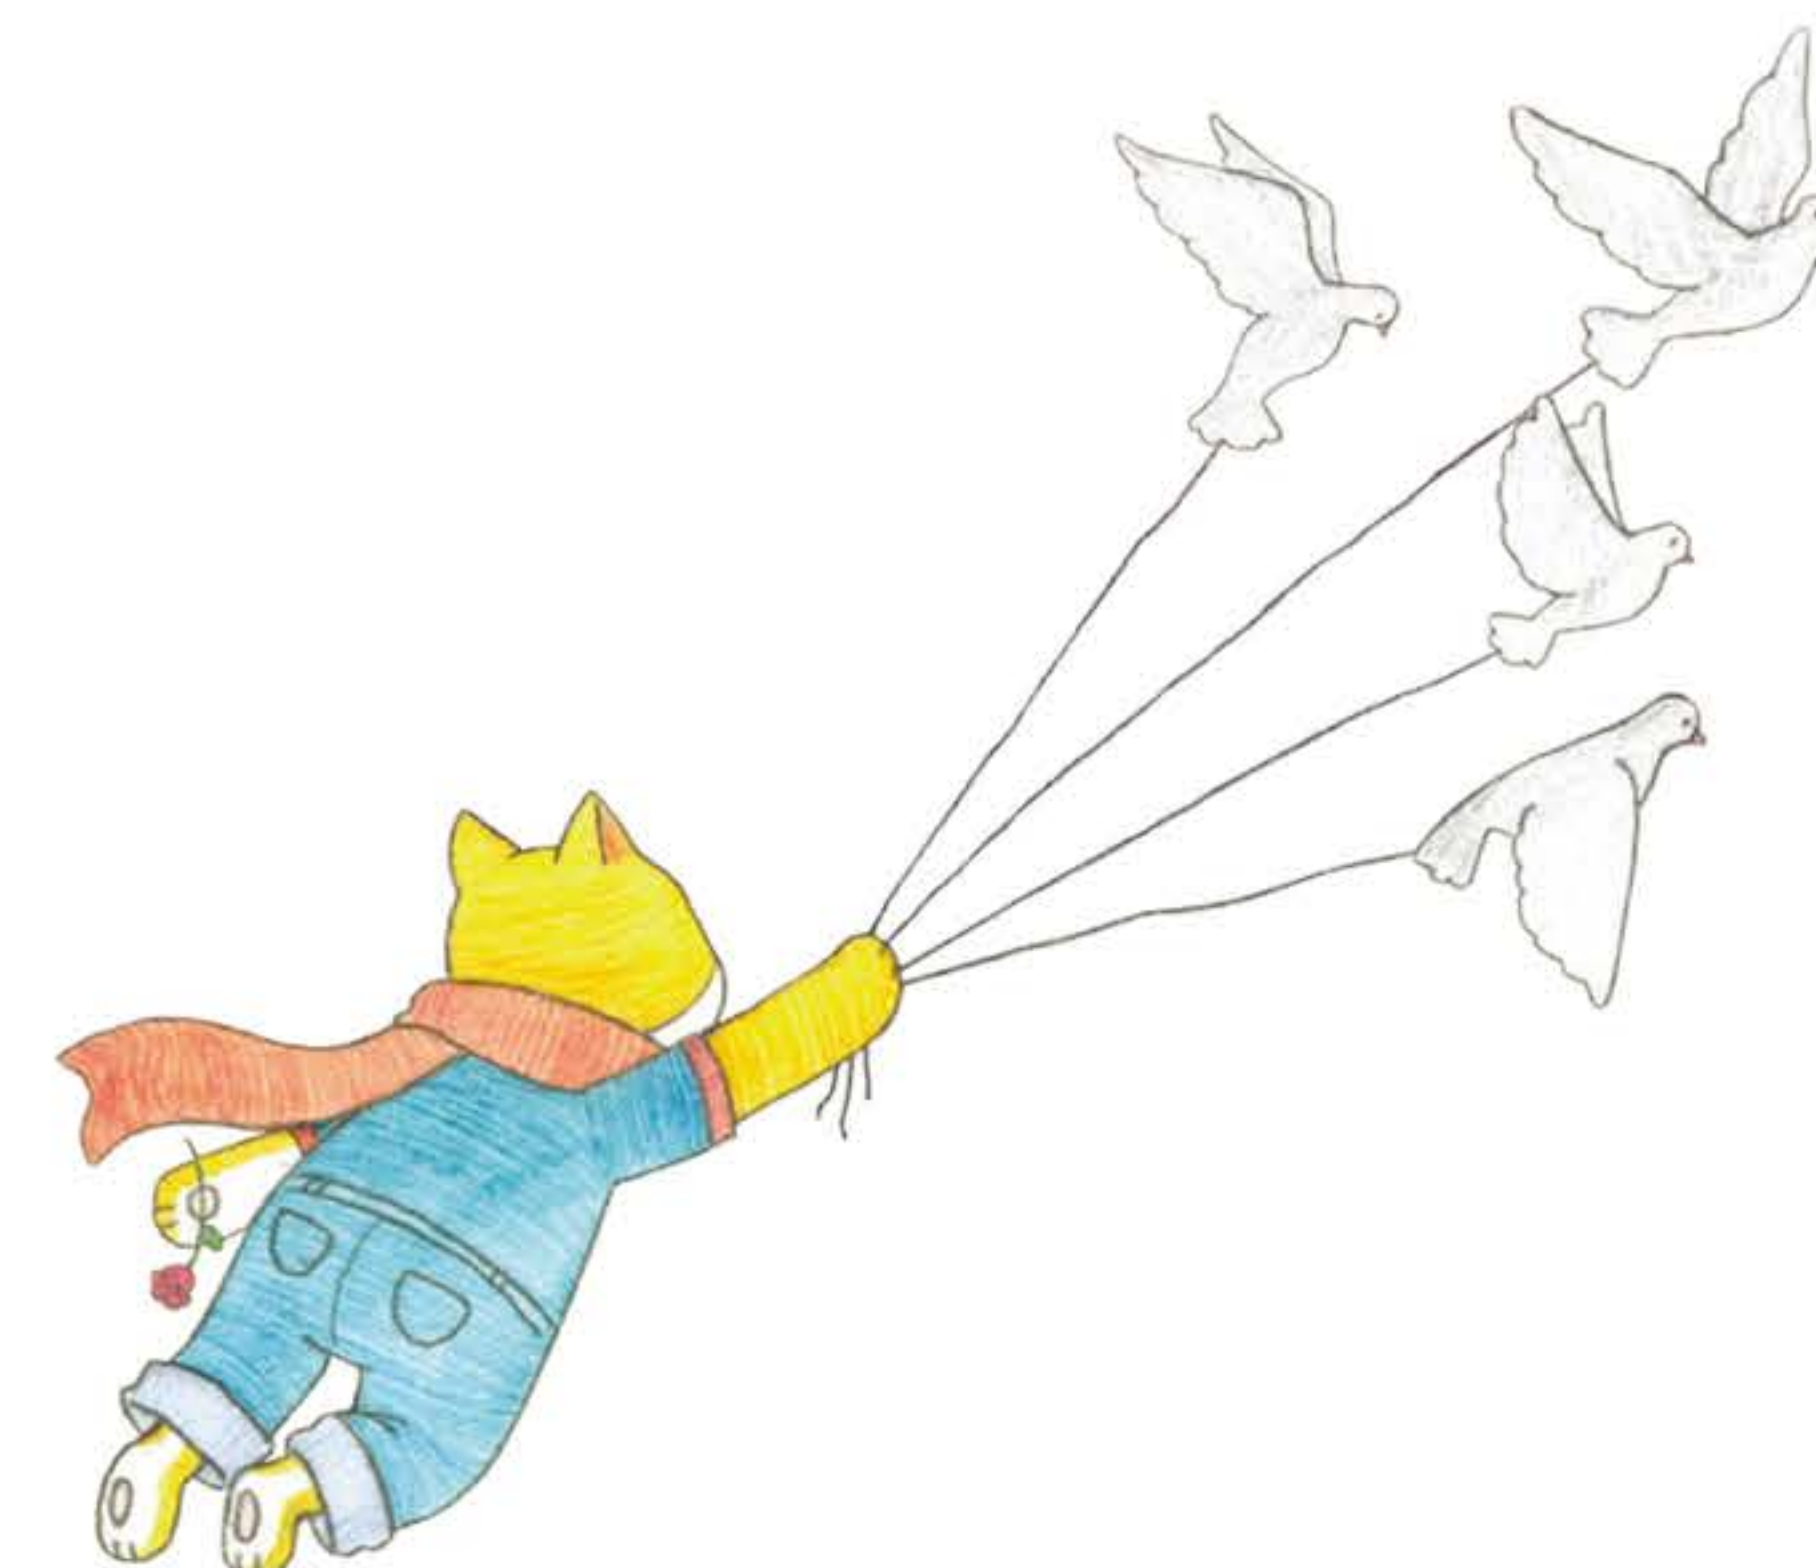

Model	MEDISAND(MEDISAND-A200, MEDISAND-H200)
Size	<ul style="list-style-type: none"> • Product Size: 125mm x 32mm x 190mm(Inner Box Size), 200g/ea • Package(Carton Box) Size: 370mm x 270mm x 400mm, 40Ea
Material	<ul style="list-style-type: none"> • Bead: Potato & Corn starch • Package: Zipper pack(PE+ Aluminium)
Feature	<ul style="list-style-type: none"> • Color changes in hematuria and alkaline urine • MEDISAND is a simple urine test for cats that checks the degree of alkalization and hematuria of cats' urine, not medical tests. The final diagnosis should be made by a veterinarian's opinion and examination at the hospital.
Notice	<ul style="list-style-type: none"> • HS CODE: 3824.99

How to Use

1. Clean the cat bathroom you are using and put new litter on it.
2. Sprinkle MediSand evenly on the cat litter.
3. Check if there is a change in the color of MediSand that came into contact with the urine after the cat urinated.
4. If there is a color change of MediSand, observe it repeatedly for at least one day.
5. If the color changes are repeated, a hospital visit is recommended.
